A GUIDE TO TRAIL ETIQUETTE

How to recreate responsibly and effectively in Summit County

Venture onto any Summit County trail and you're quickly surrounded by beauty. The slight whisper of the wind through the pines, the crunch of gravel beneath your tires and the refreshing feeling of mountain air filling your lungs all serve as constant reminders that a break from the busy streets of Summit County's towns in the summer is never out of reach.

As more and more people pile into trailhead parking lots and climb across Summit County's vast web of off-road connections, understanding and practicing proper trail etiquette becomes extremely important.

One of the biggest and often overlooked rules involves avoiding trails that are closed or muddy. Biking or hiking on muddy trails is dangerous and causes erosion, making a hike or bike ride less enjoyable.

Recreationalists will often try to bypass muddy sections of trails by hopping or riding onto the shoulder, but that widens the trail and creates unnecessary disturbances to the natural environment over time.

TOP: Ollie Dautremont, 8, of Iowa, carefully crosses a stream while hiking the Lily Pad Lake trail with his family in August 2019.

BOTTOM: While hiking in Summit County, always stay on trail and remember to follow Leave No Trace principles by packing out anything you pack in.

"Our typical message is that if you are leaving tracks, turn back," Summit County Open Space & Trails Senior Resource Specialist Jordan Mead said. "If you are leaving tracks on a trail that you expected to be dry, it may be a good day to find an activity on a road or a paved surface like the recpath. If you are on a trail and happen to come upon a section of a trail that is muddy, you should always travel on the trail surface, directly through any puddles or water. Don't skirt out around it."

When unsure about current trail conditions, Summit County Open Space and Trails recommends visiting trail condition pages or apps, like AllTrails or TrailForks.com. Many towns have trail condition signage that indicates closures, wetness and other vital information.

"I always recommend that people use their favorite trail app or crowd-sourcing-type apps where people can give live feedback," Mead said. "I recommend people check those before they head out to their favorite destination just to get the most recent report from other people that have been there."

Another huge aspect of proper trail etiquette is who gets the right of way. In all instances bikers must give the right of way to hikers, and both hikers and bikers must yield to any horses on the trail.

Though it is often easier for a hiker to move out of the way, a biker should not expect a hiker to yield at any point. Additionally, all downhill bike or foot traffic must yield to uphill traffic.

"If you are a mountain biker, you need to be aware that, when it comes down to it, it is your responsibility to yield to the foot traffic," Mead said. "At the same time, if you are

PHOTO: (TOP) HUGH CAREY | (BOTTOM) ELAINE COLLINS

aware of your surroundings as a biker or a hiker on a busy trail, you should be able to have that moment of awareness and make that decision with the other user. Whatever comes naturally usually works."

Perhaps the golden rule of respecting trails is the "pack it in, pack it out" principle. It is important to be prepared for excursions out on the trail with snacks and food, but is also paramount to the long-term health of the trail and surrounding ecosystem that all trash makes its way back with you at the end of the hike or bike ride. If there is no trash can in the parking lot, make sure you take your trash home with you.

"I usually carry a dog poop bag with me in my pocket even if I don't have my dog with me because I can use that as a little trash bag basically," Mead said. "Bringing a doggy bag or a (disposable) bag is a really nice way of transporting trash home without getting the stuff in your pack all messy."

To help with the trash problem, Summit County Open Space and Trails also plans to add more trash cans to some of its trailheads so that users can easily dispose of any waste on sight.

Although trailhead parking lots may not seem like they are part of a trail system, they also see plenty of wear and tear. Due to a lack of parking spots at trailheads, Summit County, towns and the U.S. Forest Service recommend that the public try to use public transportation to trailheads if they can via Summit County's Transit to Trails program.

Transit to Trails is a free service where recreationists simply need to hop on the Summit Stage bus to access trailheads across Summit County. To view the list of trails on the route, visit TinyUrl.com/pae9z9et.

In terms of use, trail users should look at the trailhead before venturing out on the trail. At this time, Class 1 e-bikes are only allowed on the Frisco Peninsula Trails, the Summit County Recpath and other motorized routes on U.S. Forest Service lands.

The town of Breckenridge Open Space and Trails website offers updated trail information and conditions at BreckOst.com/the-trails. Summit County offers updated recpath conditions at TinyUrl.com/yav8bhbd. ●

For more trail etiquette tips, visit TinyUrl.com/hpbafpnc.

TOP: Penelope Paiement, 12, pets her horse, Sundance, while taking a ride in Summit County in October 2023. All trail users yield to horses, making sure to take caution not to spook them.

BOTTOM: Bikers ride up a hill at the Frisco Adventure Park after a morning of biking on the Frisco Peninsula.

TRAIL TIPS

On top of always reading the signage posted at a trailhead and following rules on the trail, here are some simple tips on trail etiquette, according to the Summit County Open Space & Trails Department:

- Ride on open trails only — respect trail closures including seasonal or short-term closures
- Do not pass off the trail — yield to other users
- Never ride in designated wilderness areas, which are closed to bikes
- Don't skid
- Don't ride muddy trails
- Don't ride around water bars — erosion is a trail's worst enemy
- Stay on existing trails
- Don't shortcut switchbacks
- Follow Leave No Trace principles — pack it in, and pack it out

Mountain dryad and Alpine forget-me-not grow in the Alpine tundra, a beautiful but fragile ecosystem found at Colorado's highest elevations.

LIFE ABOVE TREELINE

Summit County's Alpine tundra has a lot to offer — if humans help protect it

by Ryan Spencer

For most of the year, snow covers Colorado's highest peaks. Above about 11,000 feet, cold blustery winds can be relentless through the winter.

But summer can transform these Alpine tundra environments into scenery blossoming with life. For a few short weeks between late June and the end of August, wildflowers bloom magnificent colors as yellow-bellied marmots soak up the sun and pikas scurry around the rocks. As the name would suggest, much of Summit County exists above tree line, meaning these beautiful — but highly fragile — Alpine environments are not far away anywhere in the county.

"You have this short period, mostly in the second half of summer, where you can actually see these plants blooming," said Karn Stiegelmeier, a longtime resident of Summit County and a member of the Eagle-Summit Wilderness Alliance's board of directors. "It's just amazing to look at them and think about how they survived for 10 months and now they're blooming again."

Hikers who explore these rocky peaks will find much to appreciate. However, U.S. Forest Service scientists, as well as local enthusiasts like Stiegelmeier, say anyone exploring these areas should be cautious of where they are stepping and stay on marked trails to protect these important ecosystems.

"The Alpine environment is very delicate," said Elizabeth Roberts, an ecologist with the White River National Forest. "It's up to recreationalists to make the decision to stay in the designated areas. People can damage the Alpine tundra so that flora and plant life will struggle to reestablish itself."

Alpine tundra environments are found at high elevations worldwide, according to Colin Lee, a horticulturist with Betty Ford Alpine Gardens in Vail. Colorado's Rocky Mountains host over 300 endemic Alpine species that can't be found anywhere else, he said.

Almost all the wildflowers found in the Alpine tundra are perennials, meaning they regrow every spring, as opposed to annual plants, which live for one growing season before dying off. This adaptation — to regrow rather than reproduce from seed every year, which requires much more energy — is just one of many adaptations Alpine flora have acquired through millennia to survive in the harsh climate above tree line.

"These plants have to get through their whole reproductive cycles, sometimes as short as six or three weeks," Roberts said. "That is a very impressive process that we want to leave undisturbed."

Almost as soon as the snow starts to melt, flowers start to bloom, starting with yellow glacier lilies. With no trees for protection, wildflowers and other plants in the Alpine tundra grow low to the ground and tuck themselves into fellfields and rock crevices, Roberts said.

Many Alpine plants are cushion plants, which form mats that can look like ground-hugging clumps of moss, according to the National Parks Service. Numerous flowering plants at this elevation have dense hairs to protect against the wind, and some cushion plants have long taproots that snake deep into the rocky soil.

Species of wildflowers found in the Alpine tundra are often related to those found at lower elevations, Roberts said, but are usually dwarfed versions adapted to the severe conditions. This includes Alpine sunflowers, Alpine columbine and many other species.

"My favorites are the Alpine forget-me-nots and the moss campion," said Stiegelmeier. "They tend to grow up together up there and create the contrast of the pretty blue and the pretty pink. It's just awe-striking — awesome — that these plants survive."

Marty Richardson, a former Summit County resident who led wildflower hikes with Colorado Mountain College for more than 12 years, noted that the Alpine tundra in Colorado

PHOTO: MARTY RICHARDSON

has some of the northernmost 14ers in the contiguous United States. Such elevations aren't found again in the northern Rockies for hundreds of miles, up in Canada.

"We have a lot of plants here in Colorado that are disjunct populations that were left here when the last ice age receded," Richardson said. "And you won't see them again — if ever — until you get to much further north territory."

Areas such as Vail Pass, Loveland Pass and Arapahoe Basin Ski Area — where visitors can often drive and park or take a chairlift up into the Alpine tundra — are great spots to view mountain wildflowers in and around Summit County, Richardson said. To find lush patches of Alpine paintbrushes and columbines, look for where mountain streams flow through the Alpine tundra, she said.

"When you're in the Alpine, especially in the Southern Rockies, the amount of solar is just intense, and because of that you're going to see a lot of plants that have very intense colors in response," Richardson said. "Brilliant blues and pinks and yellows in particular. Just really knock-your-socks-off colors."

In addition to the beauty of these wildflowers, hikers should come to appreciate the longevity of many Alpine plants, she said. Many species grow for decades in the same spot but can die off quickly if trampled by people or dogs.

"Some of them can be more than 100 years old if they're really large patches," Richardson said. "And if somebody steps on them, they're gone."

According to Jen Prusse, a wildlife biologist with the White River National Forest, protecting Alpine plants also helps protect wild animals that live at these elevations — such as pikas and marmots, bighorn sheep and ptarmigan.

"The tiny feisty pika looks like a tiny potato with Mickey Mouse ears," Prusse said. These small Alpine mammals conduct over 14,000 foraging trips every summer to collect grasses and wildflowers and stash them near their dens, she said.

Somewhat bigger than pikas are marmots, another Alpine mammal. These large ground squirrels can often be found soaking in the sunshine in the summer and have adapted to hibernate through the winter, often cuddled together in dens of 10 or more, Prusse said.

Meanwhile, bighorn sheep which, unlike mountain goats, are native to Colorado, have adapted a thick, double-layered coat with a soft inner layer and thick outer guard hairs. With hooves adept at navigating steep terrain and horizontal pupils to help them see approaching predators, bighorn sheep can sometimes be found scaling treacherous mountain outcroppings in the Alpine tundra, according to Prusse.

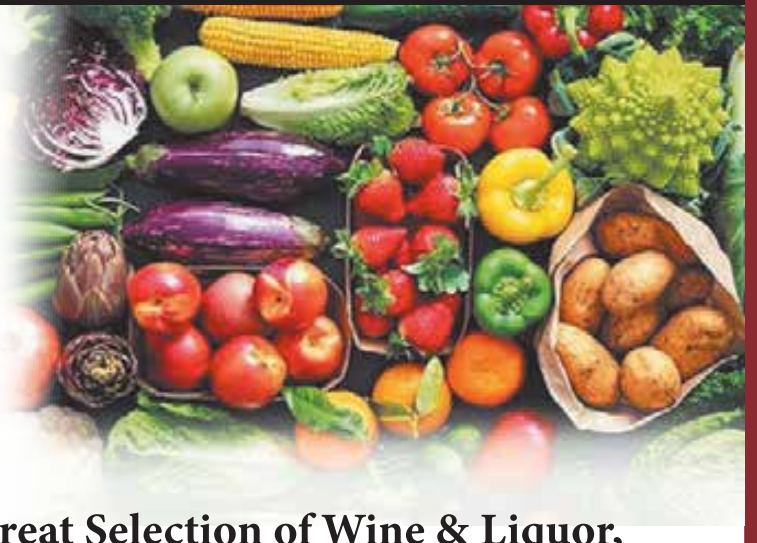

Of all of Colorado's birds, only one — the white-tailed ptarmigan — lives in the Alpine tundra year-round. Masters of camouflage, ptarmigans' feathers are pure white in the winter and in the summer are gradually replaced by mottled black, brown and tan that blends in with the rocky terrain.

Because of the short summers and harsh conditions in the Alpine tundra, wildlife that lives at these elevations can be especially impacted by human disturbance, Prusse said.

Even in the summer, there can be a harsh climate in the Alpine with chillier temperatures than lower elevations and dangerous lightning storms that hikers should be prepared to avoid by checking the forecast and dipping below tree line by afternoon, when the storms tend to occur.

HOW TO PRACTICE FIRE SAFETY

by Anna DeBattiste, Colorado Search and Rescue Association

If you're planning a hiking, backpacking, camping or any other outdoor recreation trip this summer, start with a trip plan, prepare for sudden changes and don't be part of the problem.

START WITH A SOLID TRIP PLAN

Trip planning means doing your homework on the route you plan to take and leaving details with a responsible person back home who can report you overdue if you don't return by your planned time. As part of your homework, check the Colorado Department of Fire Prevention and Control's Wildland Fire Status Dashboard and/or the Bureau of Land Management's Fire Information Dashboard online and make sure you are aware of any active wildfires that might be in the region of your planned outing. If you recreate in Summit County, check for White River National Forest restrictions or closures on the U.S. Forest Service's website, and sign up for Summit County Alerts on the Summit County government website. Be aware, however, that if you are out of cell service or carrying your phone in airplane mode to conserve the battery, you will not receive alerts. Your research and trip planning process should include finding out whether you'll have cell service or not. If you won't, it's always a good idea to consider carrying a two-way satellite communications device.

BE PREPARED FOR SUDDEN CHANGES

No matter how thorough your trip plan, conditions can change at a moment's notice. Prepare for possible hot, dry, windy conditions. Keep your eyes on the skies and your head on a swivel for signs of changing weather conditions or a nearby wildfire. If you see incoming weather or smoke, it doesn't matter what your pre-trip research says — prepare for and react to what you see happening in the moment. If you have to change your trip plan, be sure to notify your person back home.

DON'T BE PART OF THE PROBLEM

As you plan your route, check the Colorado Division of Fire Prevention and Control website for fire restrictions and keep checking it right up to your departure date. "We expect fire restrictions to start early this year," says Tracy LeClair, public information officer for Colorado Department of Fire Prevention and Control. The front desks of local Forest Service ranger district offices are also good sources of information on current fire restrictions, as well as local fire activity.

Regardless of fire restrictions in the area, consider whether you really need a campfire this year, or even a camp stove. A jetboil can be a perfectly good substitute. If campfires are not prohibited and you decide to have one, be sure your fire is dead out by drowning the ashes in water before you leave the campsite. They should be cool to the touch.

Every year, on average, human-caused wildfires account for approximately 85% of wildfires in the United States. Though most of these fires are caused by accidents, many can be prevented. Use Colorado Department of Fire Prevention and Control's website to educate yourself on how you can prevent wildfires and mitigate the impacts of wildfires on your community.

As a backcountry recreationist, you may also get the opportunity to help the firefighters. "The majority of fires on the San Juan Forest and many other high-country places are started by lightning, and the Durango Interagency Fire Dispatch receives a large percentage of initial reports of fires from hikers," Lorena Williams, public affairs officer for the San Juan National Forest, said. "Should you encounter a wildfire, please call 911 to report the location, estimated size, description of the smoke, whether it's spreading, and whether it's moving in the direction of people, homes or powerlines."

SUMMIT COUNTY

SCAN FOR MAP

Summit County is the land of never-ending adventure. From the various recpaths that snake across the county to the trailheads that lead visitors to the most challenging mountain bike trails and summits, this map is a great resource to explore what Summit County has to offer.

A GUIDE TO RIDING E-BIKES IN SUMMIT COUNTY

What is an e-bike?
Also known as powerbikes, pedelecs or booster bikes, e-bikes are bicycles with an integrated electric motor that do not exceed 750 watts of power. They are commonly classified into distinct types.

Class 1 e-bikes are equipped with an electric motor that provides assistance only when the rider is pedaling and ceases to provide help when the bicycle reaches a speed of 20 mph.

Class 2 e-bikes are also equipped with an electric motor, but they have a throttle that can provide assistance regardless of whether the rider is pedaling. They cease to provide assistance when the bicycle reaches a speed of 20 mph, however.

Class 3 e-bikes have a pedal-assist-only electric motor, similar to Class 1 e-bikes, but they have a maximum motor-assist speed of 28 mph.

There are also e-mountain bikes on the market that are designed for individuals to use on natural terrain, trails and other non-paved surfaces.

Where can you ride an e-bike?
The U.S. Forest Service and Summit County's Open Space and Trails Department have set up rules and regulations in order to preserve trails and protect the public from potential e-bike accidents.

"Essentially, if you are not pedaling the bike, it is not legal," Summit County open space and trails director Katherine King said. "… If you are riding a bike on the recpath that you don't have to pedal to propel forward, that is not legal to use."

According to Tyler Kirkpatrick with the U.S. Forest Service, all e-bikes are considered motorized vehicles by the U.S. Forest Service, regardless of the class. As a result of e-bikes being designated as motorized vehicles, they are not permitted on non-motorized trails in the Dillon Ranger District, including those that are open to mountain bikes. That differs somewhat from the rules on county-run open spaces, where e-bikes are allowed on recpath trails, which are otherwise closed off to motorized use.

"At the county's level, you can ride Class 1 e-bikes on our paved recpath system," King said. "On natural surface trails, you can ride e-bikes anywhere motorized use is allowed."

SILVERTHORNE
COLORADO

BRECKENRIDGE

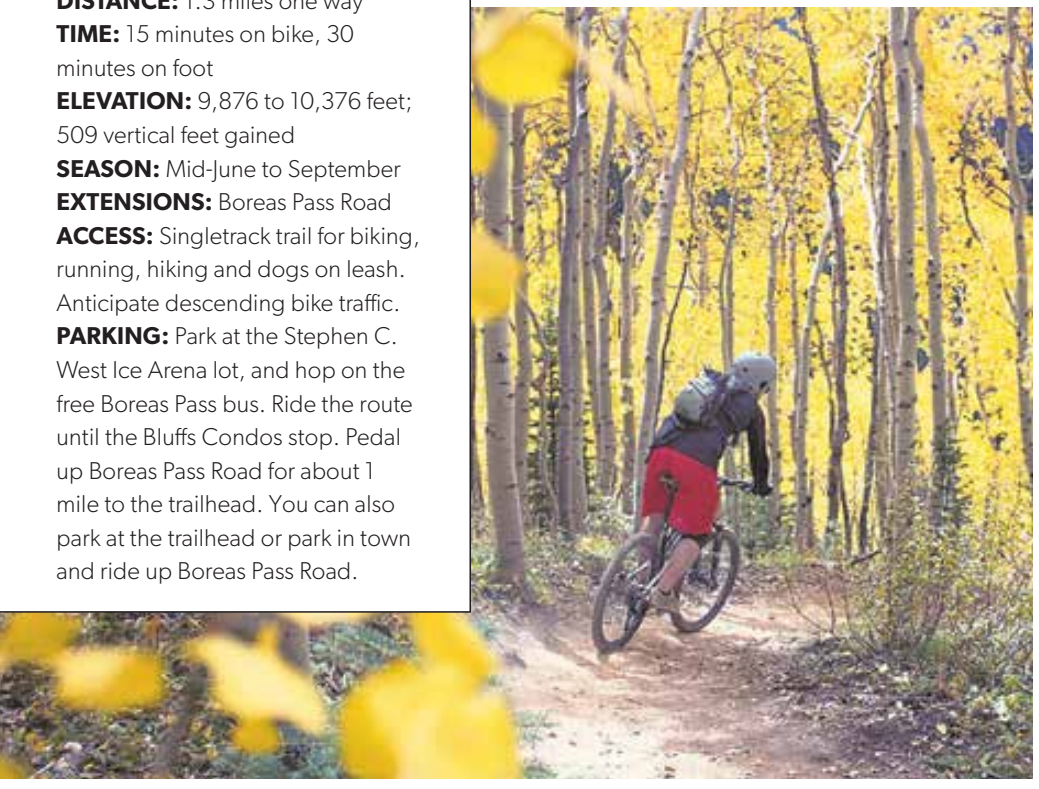

SCAN FOR MAP

Mountain bikers and hikers of all ability levels can find plenty to love in Breckenridge, from the forested loops of Aspen Alley to the mining history scattered around French Gulch. Aspens, sweeping views and wildflowers galore await.

FAST FACTS

DISTANCE: 1.3 miles one way
TIME: 15 minutes on bike, 30 minutes on foot
ELEVATION: 9,876 to 10,376 feet; 509 vertical feet gained
SEASON: Mid-June to September
EXTENSIONS: Boreas Pass Road
ACCESS: Singletrack trail for biking, running, hiking and dogs on leash. Anticipate descending bike traffic.
PARKING: Park at the Stephen C. West Ice Arena lot, and hop on the free Boreas Pass bus. Ride the route until the Bluffs Condos stop. Pedal up Boreas Pass Road for about 1 mile to the trailhead. You can also park at the trailhead or park in town and ride up Boreas Pass Road.

ASPEN ALLEY

MODERATE/ADVANCED

The Aspen Alley Trail is characterized by its loopy, whip-fast trails that take users through a mix of pine trees and must-see aspen groves. For bikers and trail runners, the trail can best be described as a "roller coaster" as it sends the user up, down and around with reckless abandon.

The trail also provides stunning views of Breckenridge Ski Resort from start to finish. In 2015, the Breckenridge trail crew finished a series of trail improvements, including mellow berms on the numerous switchbacks and natural-rock pavers on flood-prone sections. And the upgrades were a godsend: The trail sees a ton of traffic from late May until the start of winter.

BACKDOOR/SIDEDOOR

MODERATE/ADVANCED

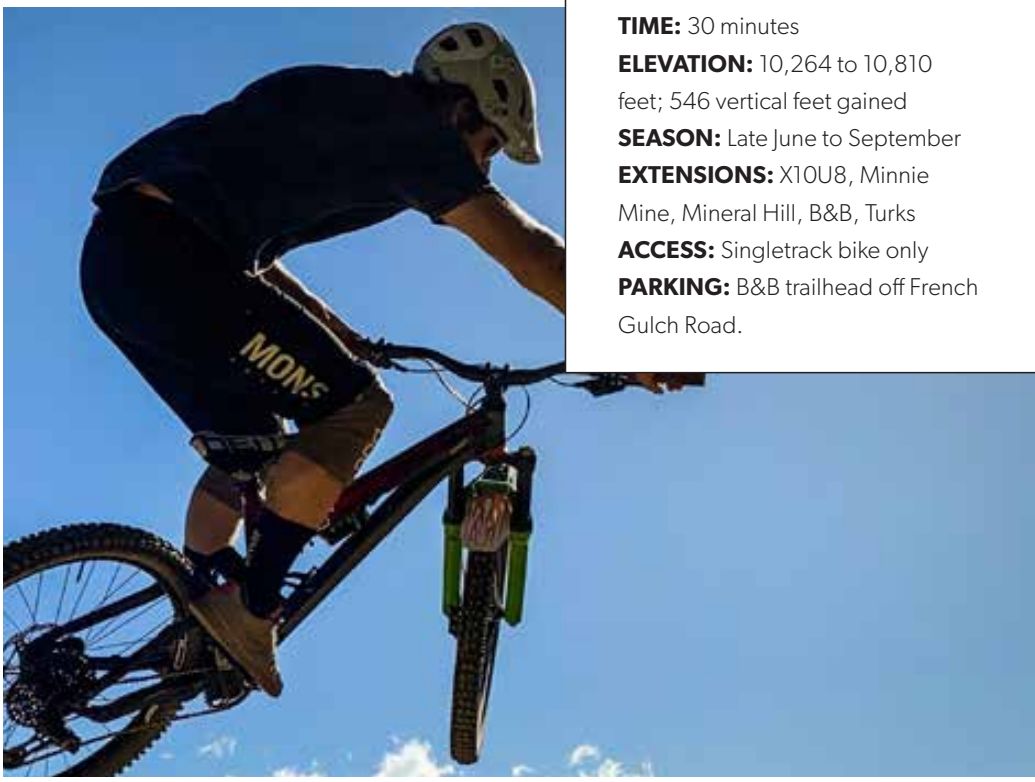

Those who visit the Backdoor Trail in Breckenridge may need to trudge up the trail for about a mile, but it is well worth it in order to come down the Sidedoor Trail and enjoy the flow trail with various small berms, jumps and drops.

Exclusively a mountain bike trail, it is a testament to the thought put into the terrain, route and ride from Breckenridge locals who know the area. For local riders, Backdoor to Sidedoor is an ideal evening loop.

Sidedoor is a true 2-mile, black-diamond downhill that will bring you back to the starting point of the trail.

FAST FACTS

DISTANCE: 3 miles
TIME: 30 minutes
ELEVATION: 10,264 to 10,810 feet; 546 vertical feet gained
SEASON: Late June to September
EXTENSIONS: X10U8, Minnie Mine, Mineral Hill, B&B, Turks
ACCESS: Singletrack bike only
PARKING: B&B trailhead off French Gulch Road.

BAKER'S TANK

MODERATE/ADVANCED

When the gate on Boreas Pass Road (near the lower Baker's Tank trailhead) is closed, Boreas Pass Road is still snowy and wet. Avoid this trail until the gate opens. Expect vehicle traffic on the road, especially on weekends throughout July and August.

Bordered by aspen trees, the ascent up Boreas Pass rewards autumn riders with colorful views of Quandary Peak and the Tenmile Range to the west. Snow tends to linger on Baker's Tank Trail early in summer, and it tends to flood in sections after heavy rains, so be cautious when using the trail. The route connects with several trails leading to public land. Know the trails and junctions before heading out. The trail can be used in either direction.

FAST FACTS

DISTANCE: 6 miles
TIME: 1 to 2 hours
ELEVATION: 10,360 to 10,850 feet; 490 vertical feet gained
SEASON: Late June to October
ACCESS: Loop dirt road for biking, hiking, trail running and dogs on leash
PARKING: Park at the Boreas Pass trailhead, or park at the Stephen C. West Ice Arena parking lot and hop on the free Boreas Pass bus. Ride the bus for about 15 minutes until it reaches the Bluffs Condos stop. Go up the road for about 1 mile until you reach the brown access gate.

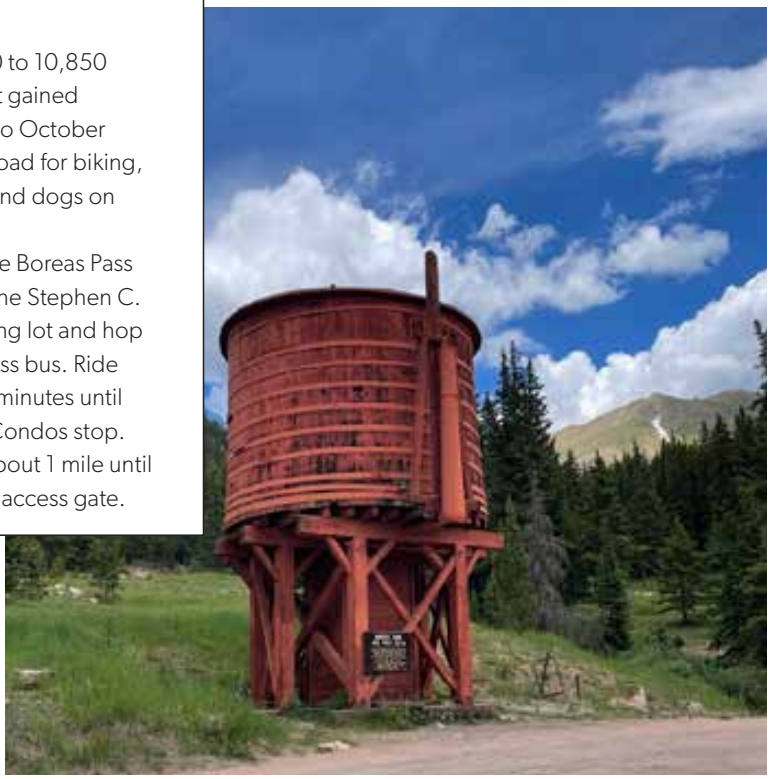

PHOTO: (TOP) SUMMIT COUNTY MOUNTAIN BIKE ALLIANCE | (BOTTOM) MATT HUTCHESON

BLAIR WITCH

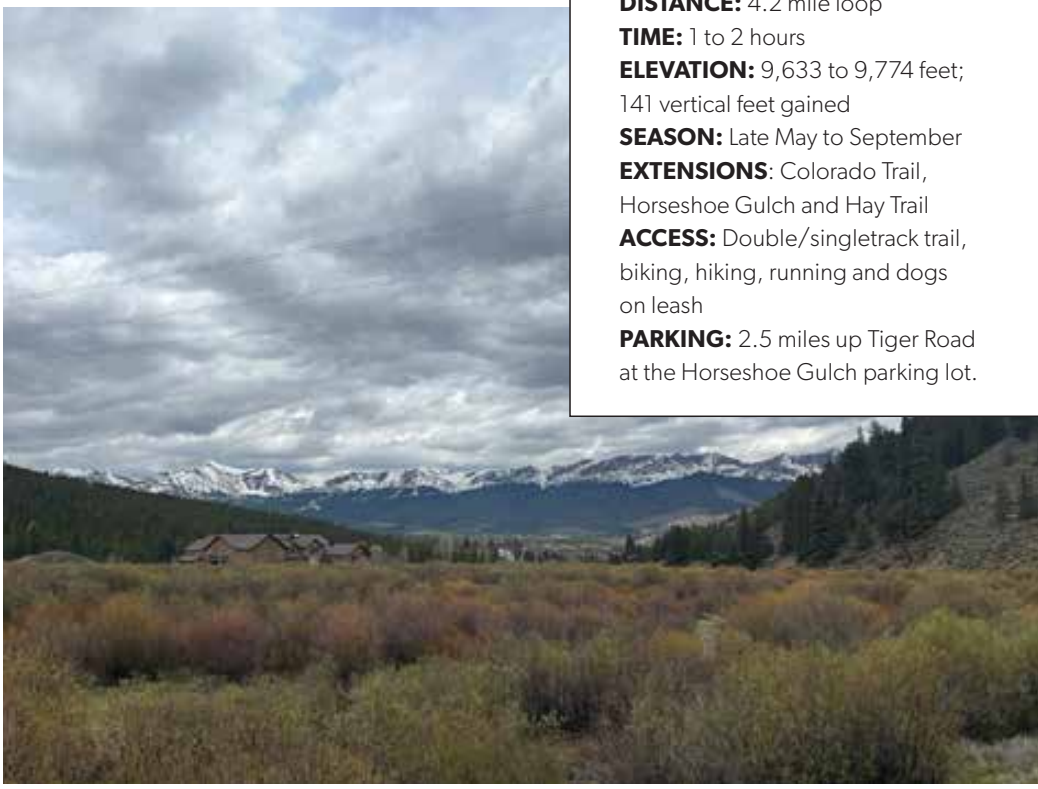

EASY/ADVANCED

The Blair Witch Trail via Horeshore Gulch Trail is one of several routes that are spread across the thickly wooded hillsides on both sides of Tiger Road. The two trails form a loop that explores a mountain drainage teeming with Jeep roads, wildlife and sagebrush meadows.

Like dozens of trails located near Breckenridge, Blair Witch passes by abandoned dredges and other long-lost pieces of the town's mining past. Early on, it also crosses paths with the fabled Summit County stretch of the Colorado Trail. The scenery is impeccable, with views of the lower Swan River Valley near the trailhead before leading to the serene, peaceful pine corridors of Horseshoe Gulch.

FAST FACTS

DISTANCE: 4.2 mile loop
TIME: 1 to 2 hours
ELEVATION: 9,633 to 9,774 feet; 141 vertical feet gained
SEASON: Late May to September
EXTENSIONS: Colorado Trail, Horseshoe Gulch and Hay Trail
ACCESS: Double/singletrack trail, biking, hiking, running and dogs on leash
PARKING: 2.5 miles up Tiger Road at the Horseshoe Gulch parking lot.

BOREAS PASS ROAD

EASY/GRAVEL

When the Boreas Pass narrow-gauge route was built in the late 1800s, the railroad companies didn't choose the location for its breathtaking beauty, but it couldn't have worked out better for modern-day cyclists and hikers.

"If you're looking for a fun gravel or mountain bike ride, you can climb up to Boreas Pass Road where you see mountain ranges from Quandary through the Tenmile Range," local mountain biker Lasse Konecny said.

The road follows the old railroad bed, giving bikers and hikers of all abilities access to scenic views and historic mining remains along the Continental Divide.

FAST FACTS

DISTANCE: 12.5 miles
TIME: 2 to 3 hours
ELEVATION: 10,360 to 11,481 feet; 1,121 vertical feet gained
SEASON: Mid-June to early October
ACCESS: Gravel road biking, hiking, horses, running and dogs on leash
PARKING: Trailhead on Boreas Pass Road, located where pavement becomes dirt

PHOTO: MATT HUTCHESON

BRECKENRIDGE RESORT

MODERATE/ADVANCED

Breckenridge Ski Area is another good option in Summit County for scenic — yet lift-served — downhill mountain bike trails.

For those not wanting to pay for a bike-haul or lift pass, cyclists and hikers can still access Breckenridge's downhill mountain biking trails by climbing the Peak 7/8 Mountain Road that winds up to Peak 8's Vista Haus from the Peak 8 base area. Breckenridge's vast network of trails allow bikers to criss-cross their way across some of their favorite ski runs in the summer that are often filled with wildflowers.

Breckenridge also offers a hiking trail near the Summit of Peak 8 that allows hikers to experience the ski area's Horseshoe Bowl, a high-Alpine gem filled with blooms.

FAST FACTS

DISTANCE: 23.9 total miles
TIME: 3 to 4 hours
ELEVATION: 9,950 to 11,058 feet
SEASON: Late June through September
ACCESS: Hiking and biking
PARKING: Gondola Lot or Peak 8.

CARTER PARK

MODERATE

Found not far from the heart of downtown Breckenridge, Carter Park is the gateway to a half-dozen singletrack routes through towering pine forests and secluded neighborhoods.

"What makes Carter Park, Carter Park? The steep climb out of the base of it," town of Breckenridge Deputy Town Manager Scott Reid said. "If you're starting at Carter Park, it is a grunt of a climb to get up that hill, but it gives you multiple options."

It's the sort of trail system Breck is known for, with quick, punchy loops over a variety of terrain. Nothing is longer than a few miles, and even the more technical sections are able to be bypassed.

FAST FACTS

DISTANCE: 6 miles
TIME: 1 hour
ELEVATION: 9,600 to 10,550 feet; 950 vertical feet gained
SEASON: Mid-June to October
EXTENSIONS: B-line, Barney Flow, others
ACCESS: Singletrack trail for biking, hiking, running and dogs on leash
PARKING: Carter Park lot.

PHOTO: (TOP) BRECKENRIDGE SKI RESORT | (BOTTOM) LIAM DORAN PHOTOGRAPHY

CRYSTAL LAKES

ADVANCED

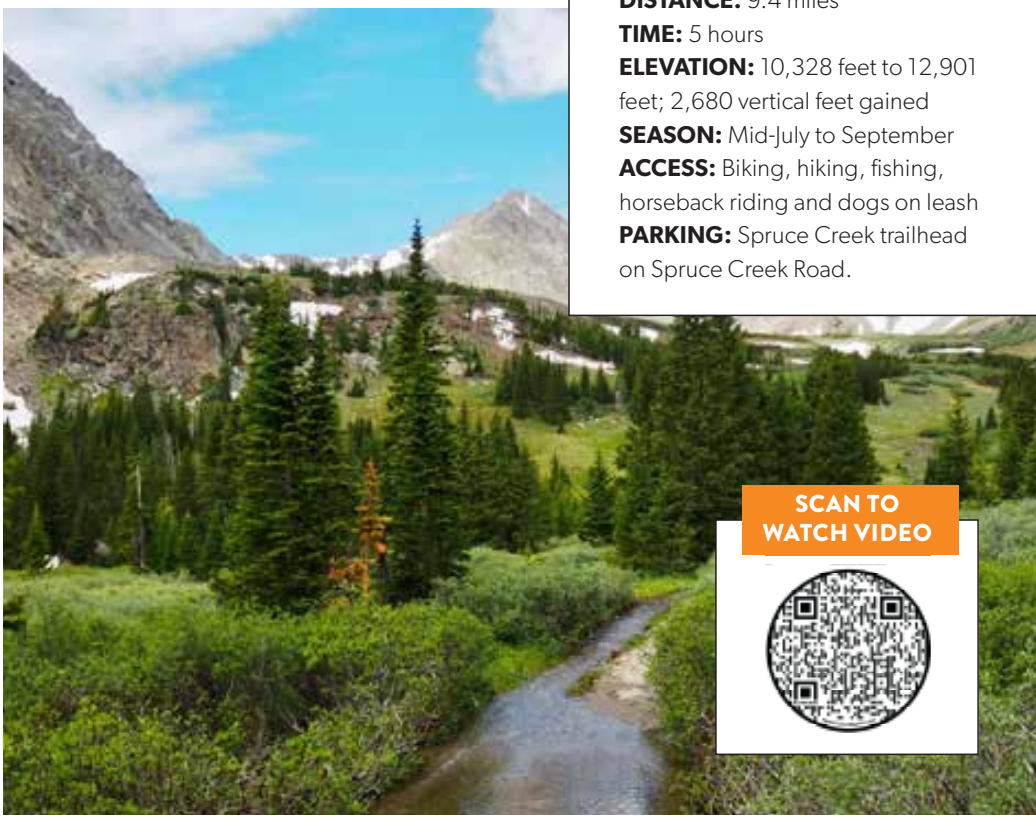

The hike to Lower and Upper Crystal Lake begins from one of the most popular trailheads in the region: Spruce Creek.

Spruce Creek Road is often very busy and best visited on a week day. That said, most of the people parked on the road hike up to Mohawk Lakes, which you get to by taking a left at a fork shortly after the Spruce Creek trailhead where Crystal Lakes Road continues at right.

The ascent to Lower Crystal Lake is over 1,500 feet and about 2.5 miles in. Once at Upper Crystal just below 13,000 feet, you get the feeling that the summit of Father Dyer is so close, yet so far. But, just being at this high-Alpine lake is a reward unto itself.

FAST FACTS

DISTANCE: 9.4 miles
TIME: 5 hours
ELEVATION: 10,328 feet to 12,901 feet; 2,680 vertical feet gained
SEASON: Mid-July to September
ACCESS: Biking, hiking, fishing, horseback riding and dogs on leash
PARKING: Spruce Creek trailhead on Spruce Creek Road.

SCAN TO WATCH VIDEO

FLUME TRAILS

MODERATE

The Highlands trail system, better known to locals as the Flume Trails, is a system of singletrack trails that runs between French Gulch and Gold Run Gulch and offers sweeping vistas. The system consists primarily of the upper, middle and lower Flume Trails, plus short (and steep) connectors like Mike's Trail and Tom's Baby outside of the golf club.

"It's good because it's immediately accessible from downtown Breckenridge," town of Breckenridge Deputy Town Manager Scott Reid said. "It reflects back to all of the ditches — a lot of the trails follow the ditches that were some of the original trails in Breckenridge when biking became popular."

FAST FACTS

DISTANCE: 1.6 miles (Lower Flume), 2.2 miles (Middle Flume), 3.2 miles (Upper Flume)
TIME: 60 to 90 minutes
ELEVATION: 9,600 to 10,685 feet; 1,085 vertical feet gained
SEASON: Late May to early October
EXTENSIONS: Mike's Trail, Slalom and Gold Run Road
ACCESS: Singletrack, loop trail for biking, hiking, running and dogs on leash
PARKING: Breckenridge Recreation Center parking lot to access the trailhead, ride east across Colorado Highway 9 to Summit County Road 450 and take the road 0.75 miles (past the 7-Eleven and liquor store) to a small trailhead sign on the left-hand side of the road just before a condo complex.

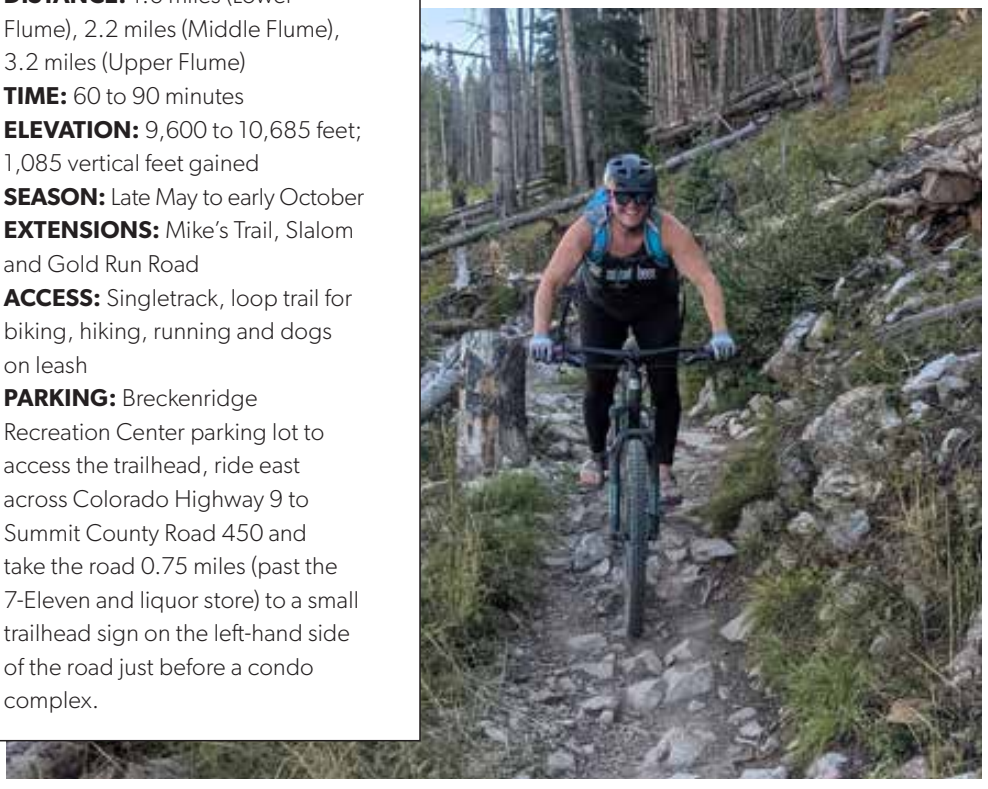

PHOTO: (TOP) ELAINE COLLINS | (BOTTOM) JENNY ANDERSON

FRENCH GULCH

EASY/ADVANCED

Outside of downtown Breckenridge, the French Gulch Road trail area offers a number of options that branch from a well-maintained dirt road ideal for gravel cycling or running that runs through historic French Gulch.

The primary trail, just beyond Breckenridge's Wellington Neighborhood, passes many old mining remains before becoming a rugged track more suited for mountain bikes and hikers that climbs steeply to a remote mountain pass, French Pass.

Most historic buildings are private and fragile, and travelers are recommended to view them from a distance.

FAST FACTS

DISTANCE: 16 miles
TIME: 3 to 5 hours
ELEVATION: 9,600 to 12,046 feet; 2,446 vertical feet gained
ACCESS: Out-and-back dirt road trail for biking, hiking, running and dogs on leash
PARKING: B&B, Reiling Dredge or Lincoln trailheads. Or park in the gondola lots on Park Avenue in Breckenridge and take a Breck Free Ride bus to French Gulch.

ILLINOIS CREEK

EASY

Tucked away in the woods surrounding Stephen C. West Ice Arena in Breckenridge sits a massive troll.

While many people would turn the other way when facing a giant in the middle of the forest, "Isak Heartstone" is frequented year-round with enthusiasm.

Accessed via the handicap-accessible Illinois Creek trailhead, users can hike close to a quarter-mile to the sculpture in the middle of the forest.

Constructed out of recycled materials in 2018 by Danish artist Thomas Dambo, the enormous wooden troll makes for the perfect photo opportunity while visiting Breckenridge and Summit County.

FAST FACTS

DISTANCE: 0.5 miles
TIME: 10-30 minutes
ELEVATION: Less than 50 feet
SEASON: May through October
ACCESS: Loop trails for hiking and walking; ADA accessible
PARKING: Stephen C. West Ice Arena parking lot off Boreas Pass Road.

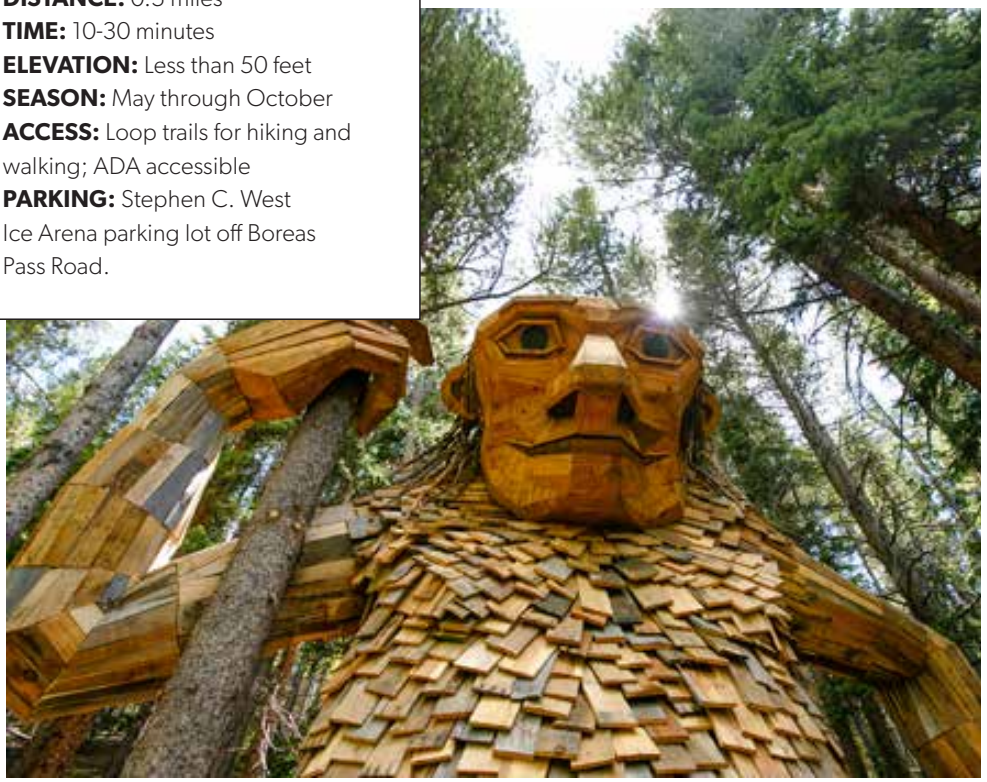

PHOTO: (TOP) MATT HUTCHESON | (BOTTOM) HUGH CAREY

PEAKS TRAIL

MODERATE/ADVANCED

The Peaks Trail can be ridden as a tough ascent from Frisco to Breckenridge, but the downhill route, which has a bit of uphill feel at the start, is the way most Summit locals prefer to enjoy this path.

Starting just below 10,000 feet, the Peaks Trail will dip and ascend through the first mile before climbing gradually to the trail's high point at 10,230 feet. The middle section of the trail heads toward Frisco from here.

When descending, keep your eyes peeled and shout ahead of turns. Over the final three miles, the trail has almost 1,000 feet of descent. The trail offers a backcountry adventure full of endless forest.

FAST FACTS

DISTANCE: 6.9 miles
TIME: 1 to 1.5 hours
ELEVATION: 9,084 to 10,230 feet; 1,146 vertical feet gained
SEASON: June to September
EXTENSIONS: Colorado Trail, Gold Hill, Miners Creek Road, South Rainbow, Rainbow Lake, Siberian Loop, Zendo, Toad Alley, Game Trail, Wire Patch Road, Swinger, Ski Hill Road, Tenmile recpath, Lake Dillon recpath and Upper Blue recpath
ACCESS: Singletrack trail for biking, hiking, trail running and dogs on leash
PARKING: Limited parking is available at the Peaks Trail trailhead where County Road 3 becomes Ski Hill Road in Breckenridge.

SALLIE BARBER

EASY/ADVANCED

This family-friendly hike and bike route boasts spectacular views and historic ruins. Beautiful stands of aspen in French Gulch make this a spectacular fall ride.

"This is best ridden as a gravel or fat bike route if you are just on Sallie Barber Road, though a full loop should be done on a mountain bike," local mountain biker Camden Latimer said.

Sallie Barber is used to access many popular trails, including in the Sidedoor and Slalom areas of Breckenridge."

"You get a lot of vert by going up it, and there's a cool mine view at the top," Latimer said.

FAST FACTS

DISTANCE: 9.5 miles
TIME: 2 hours
ELEVATION: 9,600 to 10,685 feet; 1,085 vertical feet gained
SEASON: June to mid-October
ACCESS: Hiking, biking, horseback riding, running and dogs on leash
PARKING: Park at the Lincoln Trailhead off French Gulch Road.

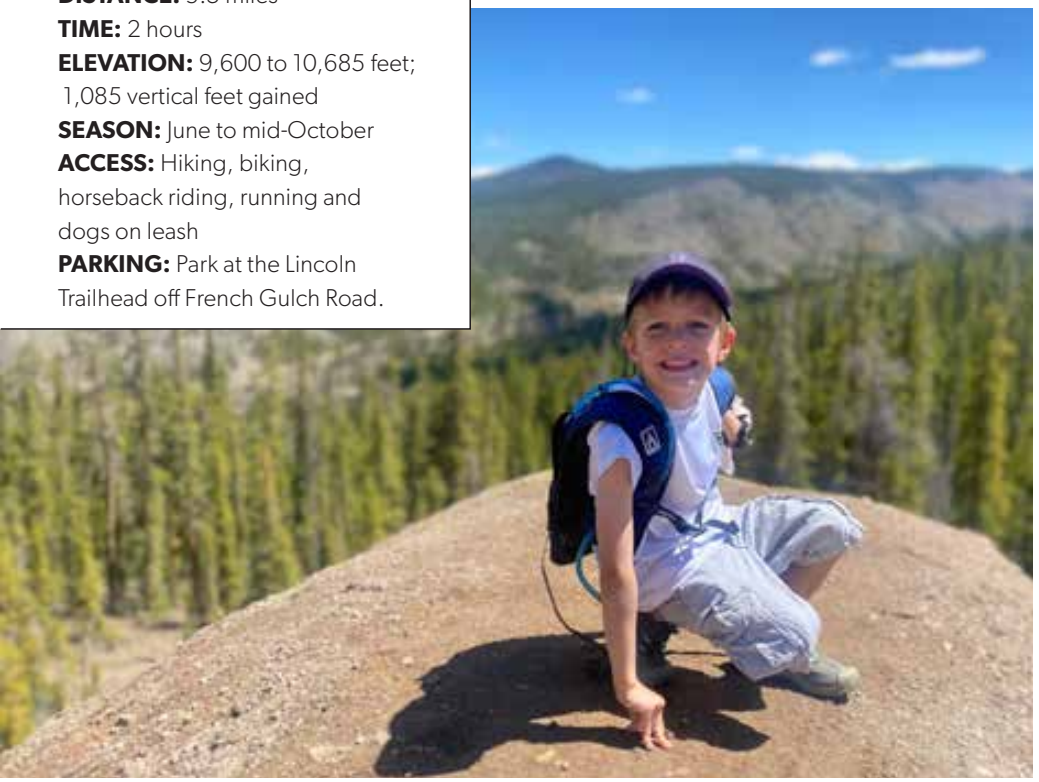

PHOTO: (TOP) ED KEIM | (BOTTOM) MATTHEW MISJA

USDA

QUANDARY PEAK

FAST FACTS

DISTANCE: 7 miles
TIME: 6 to 8 hours
ELEVATION: 10,847 feet to 14,265 feet; 3,418 vertical feet gained
SEASON: July to September
ACCESS: Hiking, backpacking and dogs on leash
PARKING: Quandary Peak trailhead parking lot on Colorado Highway 9, but reservations are required.

SCAN TO WATCH VIDEO

ADVANCED

Quandary Peak is the mountain — and hike — that many people think of when they think of visiting Summit County. It's one of the most-scaled 14ers in the state, according to the Colorado Fourteeners Initiative. But as a sign warns up at the Quandary Peak Trailhead before steeply climbing to begin your hike, "No 14ers are easy."

Due to the popularity of this trail, adventurers wishing to hike between mid-June and mid- September must reserve a parking spot at the Quandary Peak Trailhead or take a shuttle from Breckenridge. Reservations can be found at HikeQuandary.com.

It may be less than 3.5 miles to get up there, but be ready for textbook 1,000 feet-per-mile steep climbing from the very beginning of this hike. Thanks to improvement work by volunteer groups like the Colorado Fourteeners Initiative, the footing on Quandary is about as good as you could expect for a mountain that sees up to 40,000 hikers a year. There are rock retaining walls, water bars and boulder stair steps that make this steep climb a whole lot easier.

But, again, it's not an easy climb!

Less than a mile in you'll gain more than 700 feet, just short of timberline at around 11,500 feet. After a flat pitch about a third of the distance into the hike, you'll need to gain more than 1,000 feet 1.6 miles into the hike.

About an hour into the hike you will be near the tippy-top of timberline, at 12,300 feet and 1.8 miles from the start. With no weather or trees to block the view up ahead, you can see the conga line, as so many hikers put it, of the masses of humans on Quandary's east ridge. The trail is steep through relatively secure talus until the false summit of Quandary, which is 2,300 feet of elevation gain and 2.5 miles into the hike. From the false summit, stay positive, confident, hydrated and fueled. And don't look up too much! The final 1,000 feet of elevation gain from the flat false summit up to the true summit, with all those tiny humans like ants marching in the distance, can be intimidating. But you'll get there, one small step and one breath at a time. Trekking poles sure do help.

According to data collected by Summit County Open Space and Trails, it takes an average of 6 to 7 hours to climb and descend Quandary, so come prepared with plenty of extra layers, food and water.

PHOTO: BARRY CARROLL

WELLINGTON BIKE PARK

MODERATE

On the grind up to French Gulch — home to a vast network of trails like Minnie Mine, V3 and B&B Trail — drive onto Stables Drive and park just past the stables to get to the Wellington Bike Park.

Found just southwest of the Wellington neighborhood, it's home to a slew of pump tracks for riders of all ages and abilities, including a mini-berm track built for Strider bikes, a large pump track, one green level flow trail and two intermediate flow trails full of jumps.

But there's more. Just behind the track is the Wellington Trail, which is a 2.7 mile green trail that connects to French Gulch Road just below the B&B trailhead.

FAST FACTS

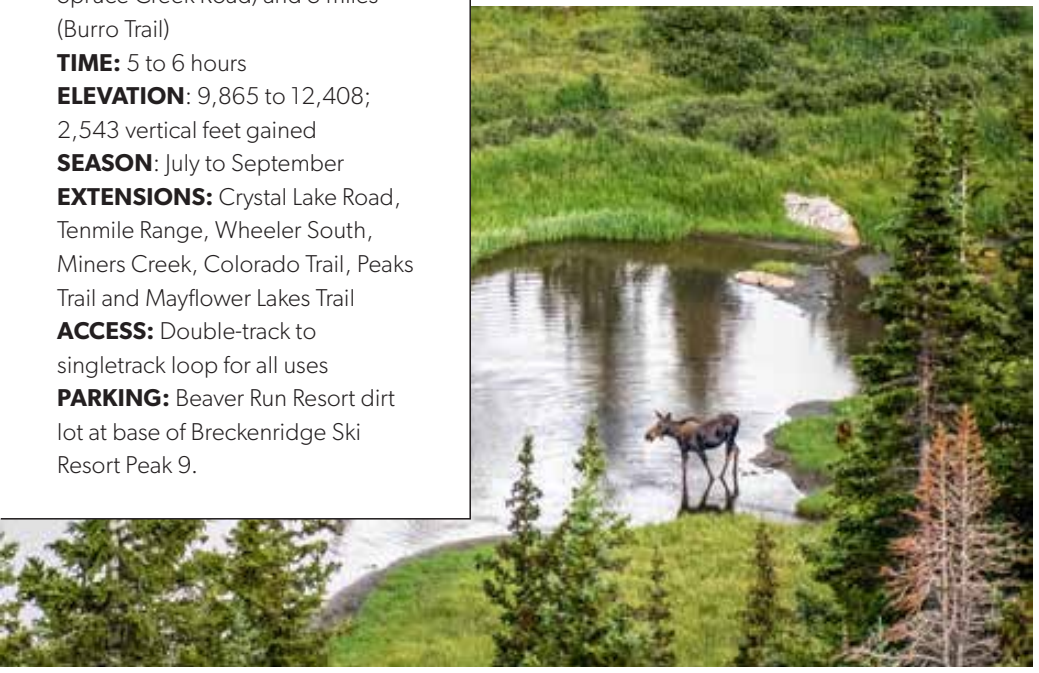

HOURS: Dawn to dusk
SEASON: June to October
ACCESS: Biking, hiking and trail running
PARKING: Just past the stables on Stables Drive in Breckenridge.

WHEELER, SPRUCE CREEK, BURRO LOOP

FAST FACTS

DISTANCE: 4.6 miles (Peak 9 Road), 2.3 miles (Wheeler), 0.95 miles (Spruce Creek Connector/ Spruce Creek Road) and 3 miles (Burro Trail)
TIME: 5 to 6 hours
ELEVATION: 9,865 to 12,408; 2,543 vertical feet gained
SEASON: July to September
EXTENSIONS: Crystal Lake Road, Tenmile Range, Wheeler South, Miners Creek, Colorado Trail, Peaks Trail and Mayflower Lakes Trail
ACCESS: Double-track to singletrack loop for all uses
PARKING: Beaver Run Resort dirt lot at base of Breckenridge Ski Resort Peak 9.

EXPERT

Enjoy the climb up Peak 9 Road, a mellow doubletrack through the ski resort with lovely views and wildflower fields.

At The Overlook Restaurant, the road becomes less maintained at that point. The climbing will get more difficult, but the views also will improve the higher you go.

If you are wanting to add more distance, jump on Wheeler Trail from the Peak 9 road to get a bird's-eye view of Summit County and a near-360 view from the pass between peaks 8 and 9.

PHOTO: (TOP) TRAILFORKS/SUMMIT COUNTY MOUNTAIN BIKE ALLIANCE | (BOTTOM) GLENN SCHUTZ

DILLON & KEYSTONE

SCAN FOR MAP

Whether you're looking for spectacular views, an adventure beside Dillon Reservoir, a challenging road for mountain biking or a simple morning hike, Dillon and Keystone have something to offer for every outdoor enthusiast.

FAST FACTS

DISTANCE: 5.5 miles
TIME: 1 to 3 hours
ELEVATION: 9,142 to 9,470 feet; 328 vertical feet gained
SEASON: June to late September
EXTENSIONS: Hay Trail, Red Trail, Keystone Gulch Road
ACCESS: Singletrack and double-track for mountain biking, trail running and hiking
PARKING: Accessed at either the Keystone Gulch or Whispering Pines trailheads.

AQUEDUCT TO SODA RIDGE

MODERATE

Mountain biking in Summit County is more than flumes, pine forests and mine tailings. When you venture into Keystone, Summit County's terrain opens up to reveal rolling meadows and faded ranch buildings. It's the other side of life in the Rocky Mountains: Alpine ranching, an industry that predates ski tourism.

This system of trails weaves past golf fairways and south into Horseshoe Gulch.

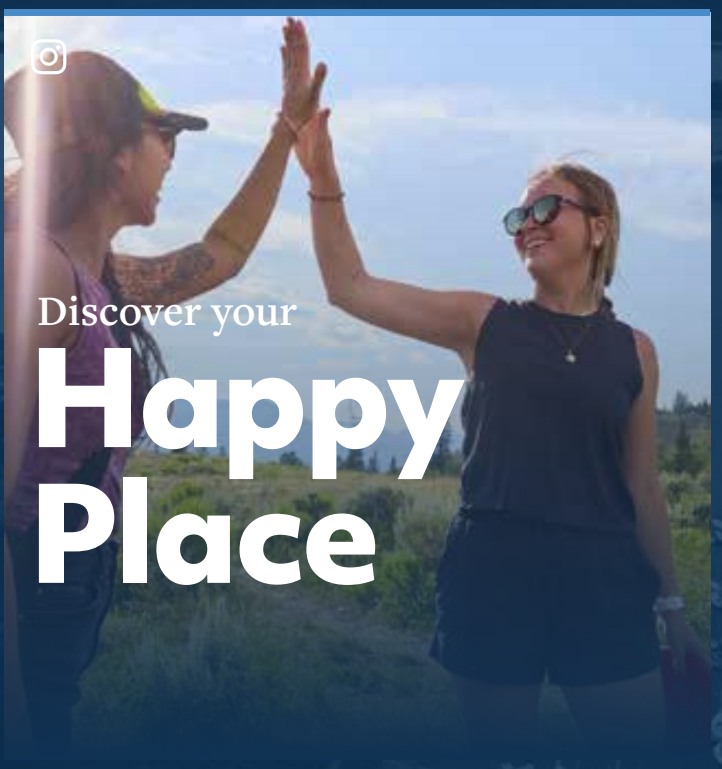

"You can go both ways on this trail and terrain," Lasse Konecny said. "It's a really fun trail system. You have pretty mellow climbs, really fun descents and really flowy singletrack deep into the forest with rivers and nature abound."

www.townofdillon.com /dilloncolorado

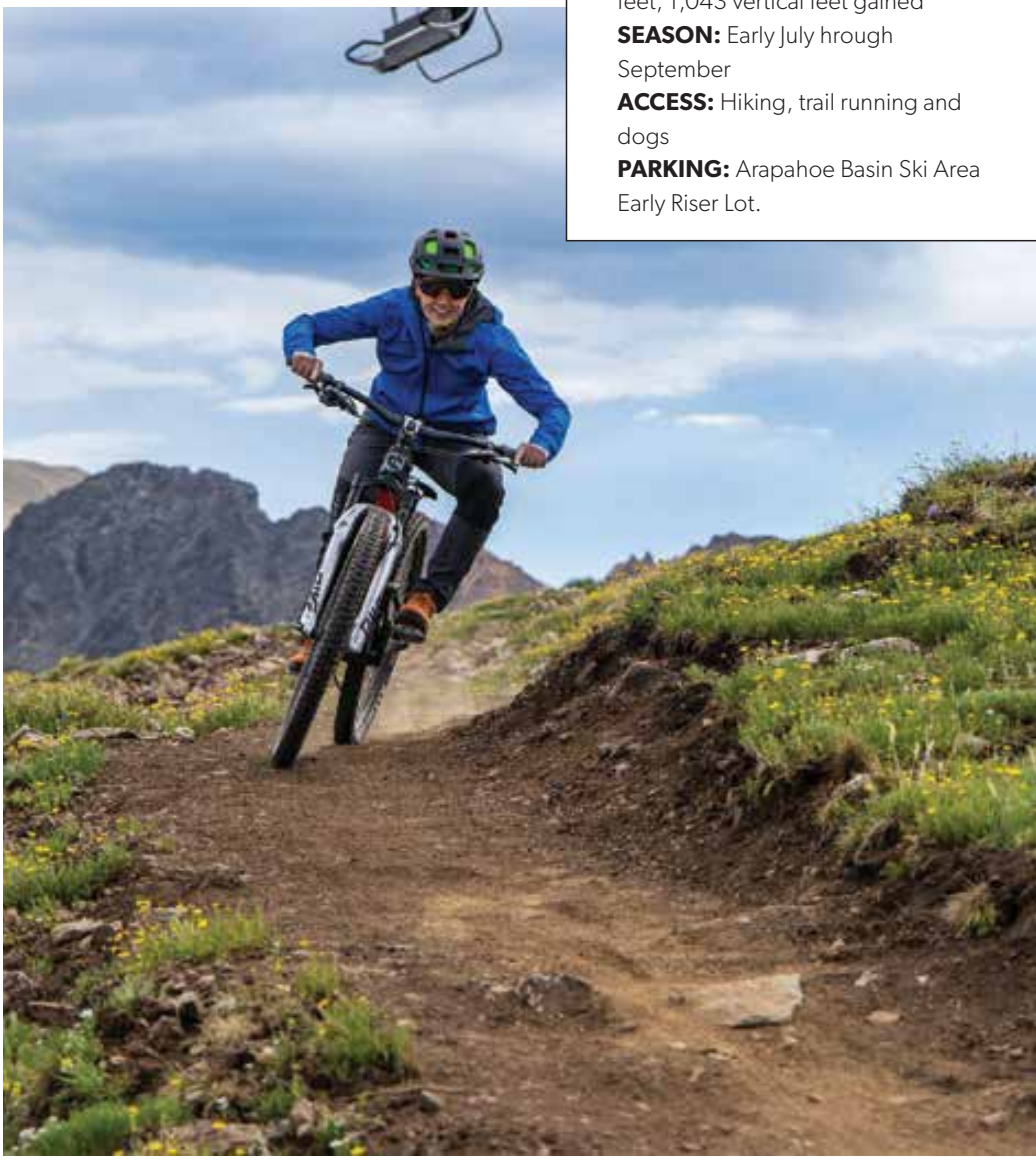

DILLON
COLORADO

ARAPAHOE BASIN & LOVELAND PASS

MODERATE/ADVANCED

FAST FACTS

DISTANCE: 10.6 miles
TIME: 3 to 4 hours
ELEVATION: 10,840 to 12,500 feet; 1,043 vertical feet gained
SEASON: Early July hrough September
ACCESS: Hiking, trail running and dogs
PARKING: Arapahoe Basin Ski Area Early Riser Lot.

The trails at Arapahoe Basin Ski Area are a perfect place to test your legs and your lungs. Some of these trails, depending on how much snowfall was received in the months prior and how sunny the skies are from May through June, might not be rideable until July due to the Basin's ideal location to receive and retain spring snowfall.

Mountain biking at A-Basin is completely free, but bikers are asked to fill out a waiver at Guest Services before hitting the trails in exchange for a free beer token to be used at the 6th Alley Bar and Grill.

There is no lift-served mountain biking at A-Basin, and the ski area currently does not offer bike rentals, beginner trails or mountain bike programming. Electric-assist mountain bikes and motorized vehicles are not allowed on A-Basin's singletrack trails but can be used on dirt roads. All parking for A-Basin trails can be found at the ski area's base.

For those interested in road riding, A-Basin is on Loveland Pass, the finish for Stage 2 of the 2015 USA Pro Challenge. The climb up to the 11,990-foot Loveland Pass summit is just over a 1,400-foot ascent on switchbacks to above tree line from A-Basin's base elevation and where you can park your car in the ski area's Early Riser lot. It's a must-do for visiting road cyclists, combining a winding 8-mile climb — if you're coming from Keystone — with an exhilarating downhill from the Continental Divide.

Loveland Pass is open to vehicles throughout the year, including tanker trucks that can't go through the Eisenhower Tunnel, so please use caution on this roadway. If you're looking to earn your grub and beer after some road-bike cranks, enjoy lunch on the deck of the ski area's 6th Alley Bar & Grill after dropping off your bike at your car.

Mountain bikers will find several options at A-Basin. Argentine North Fork is A-Basin's primary singletrack trail that is only uphill only for bikers. It begins at Mountain Goat Plaza in the base area and ascends to Black Mountain Lodge at midmountain. Hikers and bikers will find wildflowers, scenic vistas and crystal-clear streams along the way.

Wheels Up is A-Basin's downhill, bike-only flow trail from Black Mountain Lodge to the base area. Full of berms, rollers and optional lines, this playground of a trail was built specifically for bikes. Wheels Up is suitable for intermediate riders (all features can be rolled) and extra fun for advanced mountain bikers. To access, climb the Argentine North Fork Trail (uphill only for bikes) to connect to Wheels Up for an awesome descent.

Pali Road is a very steep service road that takes hikers and mountain bikers from the Upper Summer Road (just above midmountain) to the top of the Pallavicini lift. From there, enjoy.

PHOTO: IAN ZINNER/ARAPAHOE BASIN SKI AREA

SCRAP TRAILS

ALL LEVELS

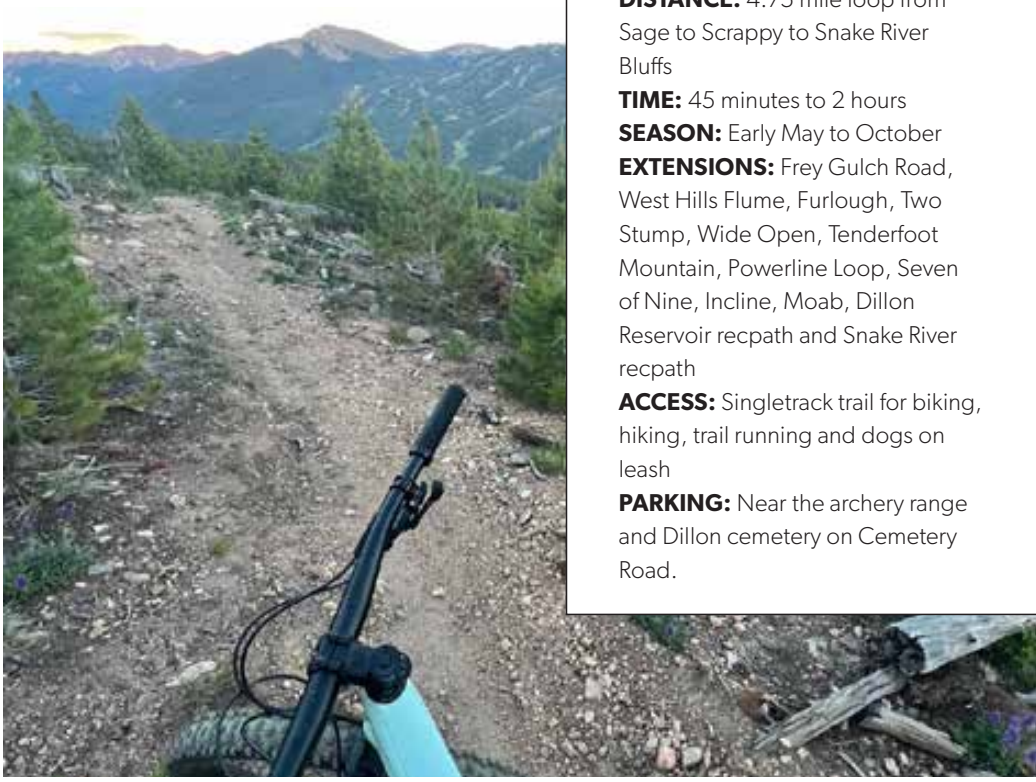

In an area known for two S-words — smell and speed — it's the latter that will stay with the trail user in the Dillon dump area.

The trail system weaves around and above the Summit County Resource Allocation Park facility and is known to be one of the first trails and mountain biking locations to dry out after Summit County's long, harsh winters. The views over the reservoir will take away your breath, and a disc golf course that attracts people from across the region can keep you busy for hours on end.

These trails will leave you howling for another "Tour de Trash" once you get back to your start point.

FAST FACTS

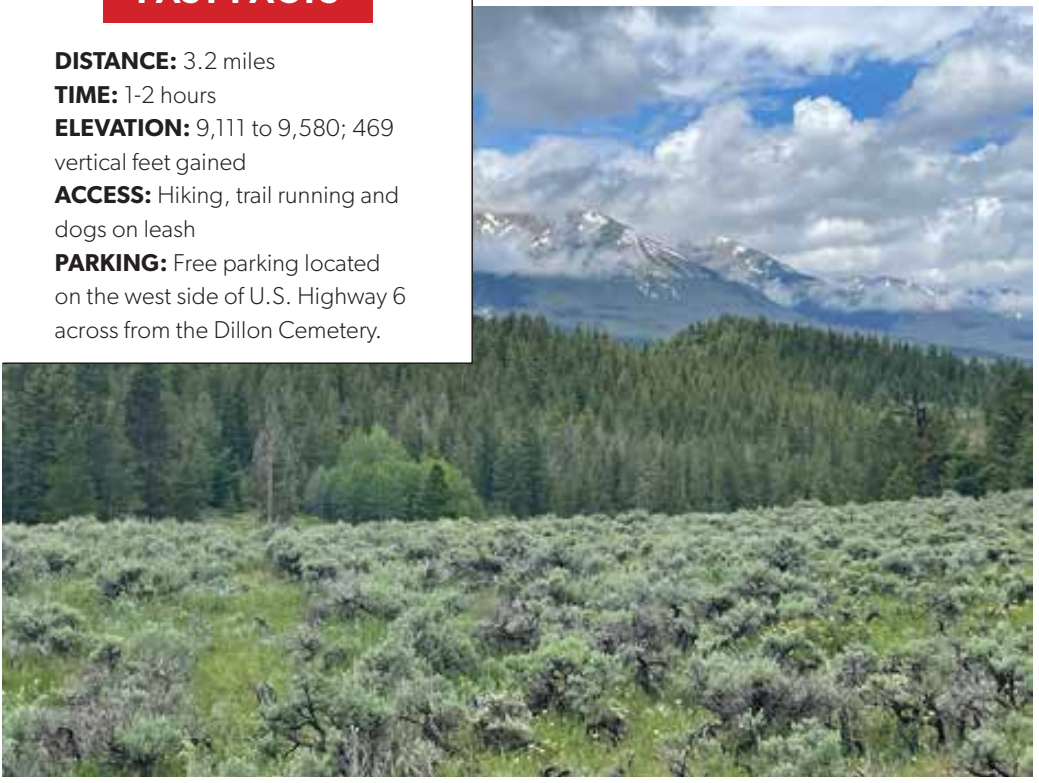

DISTANCE: 4.75 mile loop from Sage to Scrappy to Snake River Bluffs
TIME: 45 minutes to 2 hours
SEASON: Early May to October
EXTENSIONS: Frey Gulch Road, West Hills Flume, Furlough, Two Stump, Wide Open, Tenderfoot Mountain, Powerline Loop, Seven of Nine, Incline, Moab, Dillon Reservoir recpath and Snake River recpath
ACCESS: Singletrack trail for biking, hiking, trail running and dogs on leash
PARKING: Near the archery range and Dillon cemetery on Cemetery Road.

DILLON NATURE PRESERVE

FAST FACTS

DISTANCE: 3.2 miles
TIME: 1-2 hours
ELEVATION: 9,111 to 9,580; 469 vertical feet gained
ACCESS: Hiking, trail running and dogs on leash
PARKING: Free parking located on the west side of U.S. Highway 6 across from the Dillon Cemetery.

EASY/MODERATE

This trail, centered around the Robert's Tunnel Peninsula, includes the Dillon Nature Preserve and the Meadow Trail and Ridge Trail Loop.

In the nature preserve, recreationists can find family-friendly hiking on a large, relatively flat gravel road. The preserve is also rich with spectacular lakeside areas and mountain views, plus bluebird boxes for bird-watching. Bikes are not allowed in Dillon Nature Preserve.

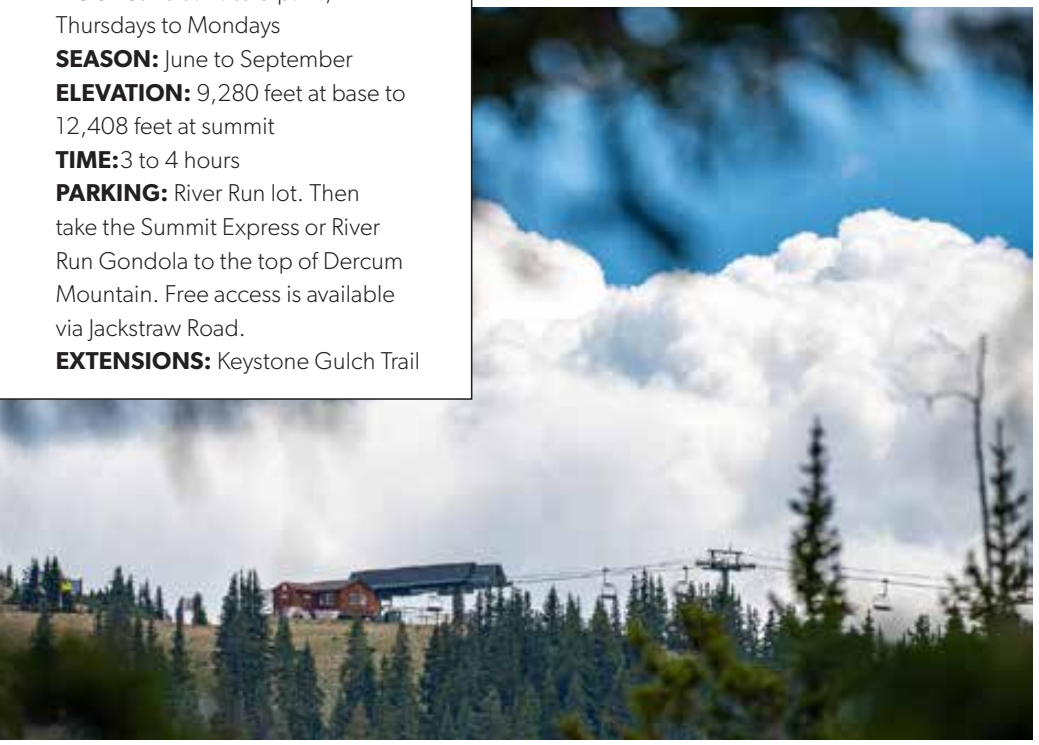

Hikers can further enjoy adventure on the Meadow Trail and Ridge Trail Loop, which can be found from the nature preserve's gate. Both feature overlooks and benches for those seeking beautiful landscapes.

PHOTO: (TOP) KENDAL JAMES | (BOTTOM) MATT HUTCHESON

KEYSTONE RESORT

FAST FACTS

HOURS: 10 a.m. to 5 p.m., Thursdays to Mondays
SEASON: June to September
ELEVATION: 9,280 feet at base to 12,408 feet at summit
TIME: 3 to 4 hours
PARKING: River Run lot. Then take the Summit Express or River Run Gondola to the top of Dercum Mountain. Free access is available via Jackstraw Road.
EXTENSIONS: Keystone Gulch Trail

MODERATE/EXPERT

Keystone Resort offers more than 30 trails of progression-focused, lift-served downhill mountain biking terrain.

For those wanting to hike, the resort offers the Dercum Summit Hiking Trail. For mountain bikers, Keystone offers a downhill, progression-focused bike park with a brand new blue flow trail, WD-40, debuting this summer. There are berms, bridges, and drops for every skill level.

Bikers and hikers visiting the resort can either pay for a bike haul pass or earn their turns by pedaling up to the summit of Dercum Mountain via Jackstraw Road.

DILLON RESERVOIR RECPATH

EASY/PAVED

Starting at the east end of Main Street adjacent to the Frisco Bay Marina, this level section of recpath winds along Dillon Reservoir's shoreline, passing by the Frisco Cemetery, Tenmile Creek inlet and Summit Middle School. The path continues through lodgepole pine forests to a section that parallels the Dillon Dam Road. After crossing access roads for Giberson Bay and the Heaton Bay Campground, it parallels the road again for a short distance and then crosses the dam.

Beyond the dam, the path curves south and takes you down around Dillon Marina. Follow the recpath to Gold Run Circle, then east on Tenderfoot Road to the trailhead, where the recpath resumes.

FAST FACTS

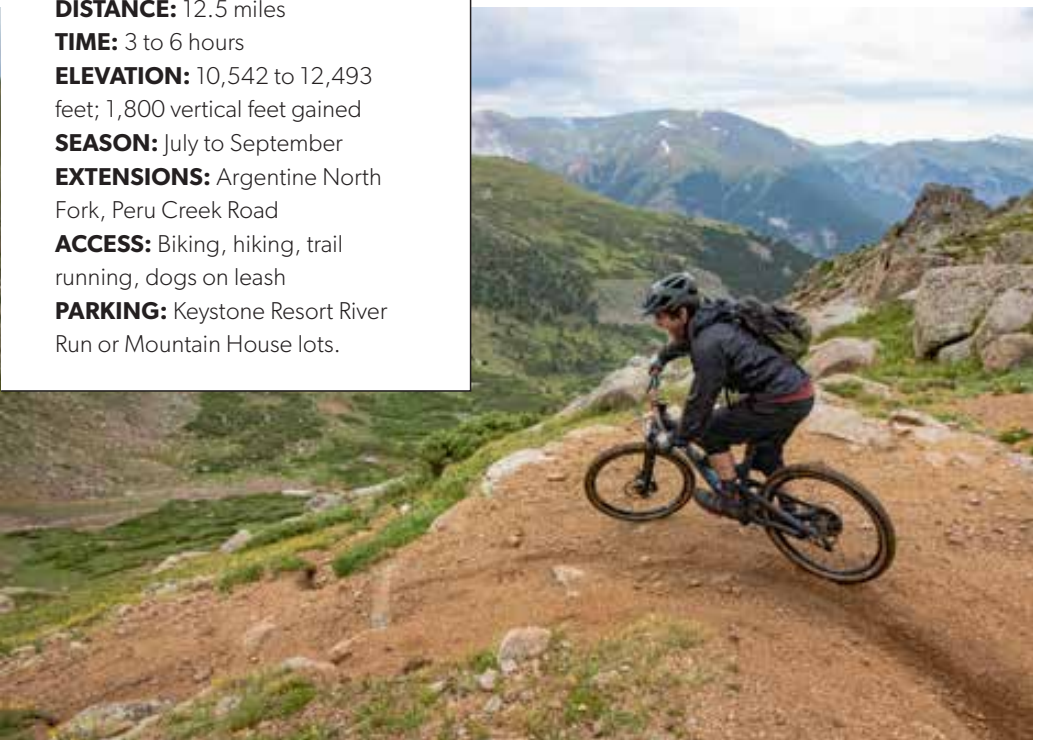

DISTANCE: 18 miles
TIME: 2 to 5 hours
ELEVATION: 9,000 to 9,800 feet, almost 1,000 vertical feet gained
SEASON: May to October
ACCESS: Paved for biking, running, walking, rollerblading and dogs on a leash
PARKING: Dillon or Frisco marinas, among other options.

PHOTO: (TOP) KATIE YOUNG/KEYSTONE RESORT | (BOTTOM) PATRICK LINFANTE

LENAWEE TRAIL

FAST FACTS

DISTANCE: 12.5 miles
TIME: 3 to 6 hours
ELEVATION: 10,542 to 12,493 feet; 1,800 vertical feet gained
SEASON: July to September
EXTENSIONS: Argentine North Fork, Peru Creek Road
ACCESS: Biking, hiking, trail running, dogs on leash
PARKING: Keystone Resort River Run or Mountain House lots.

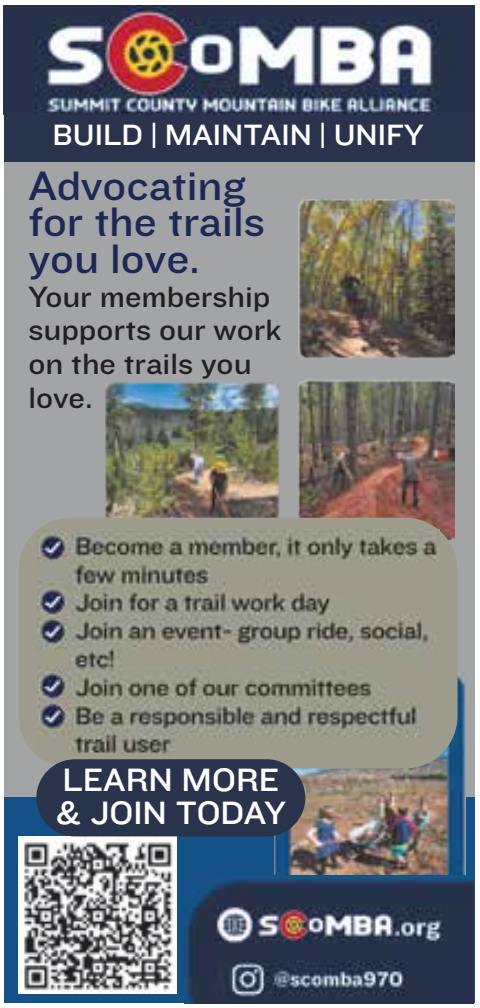

ADVANCED/EXPERT

Due to its high-Alpine setting, the Lenawee Trail is not typically snow-free until July.

High-Alpine environments come with unpredictable weather, and it's a good idea to bring an extra layer even on the hottest of summer days. It is recommended that one starts this Alpine trail excursion in the morning.

"Located on the backside of Arapahoe Basin Ski Area, the Lenawee Trail descends from an oxygen-deprived 12,500 feet through rocky Alpine singletrack to Peru Creek Road more than 2,000 feet below," local mountain biker Camden Latimer said.

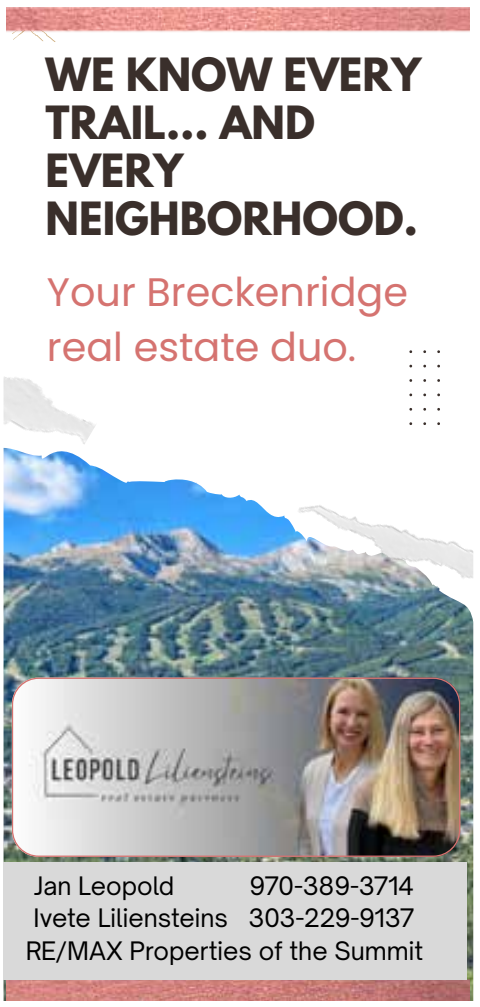

PHOTO: ARAPAHOE BASIN SKI AREA

MONTEZUMA ROAD

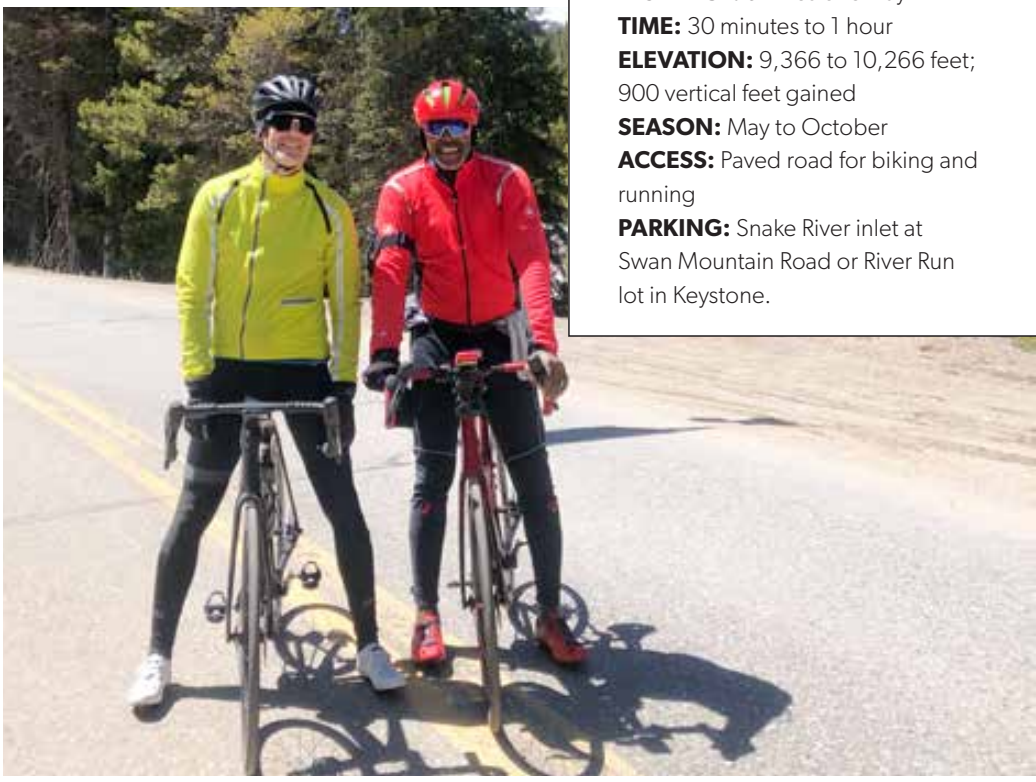

EASY/PAVED

Montezuma Road is quite accessible, as it extends where Summit County's current recpath ends. The route starts from Keystone's River Run Village, but visitors to the road can choose to extend their excursion by starting with the recpath along Dillon Reservoir.

"Just beyond Keystone lies one of Summit County's best-kept secrets," local mountain biker Patrick Linfante said. "Unlike the generally congested U.S. Highway 6 to Arapahoe Basin Ski Area, Montezuma Road offers a favorable alternative. The route leads you along the Snake River as you journey past open fields and forest, thus making it a welcome choice for local and touring cyclists."

FAST FACTS

DISTANCE: 5 miles one way
TIME: 30 minutes to 1 hour
ELEVATION: 9,366 to 10,266 feet; 900 vertical feet gained
SEASON: May to October
ACCESS: Paved road for biking and running
PARKING: Snake River inlet at Swan Mountain Road or River Run lot in Keystone.

ORO GRANDE TRAIL

MODERATE

The Oro Grande Trail is a solid early season trail option for anyone who just needs to get outside after a snowy winter.

Following an aspen-covered hillside above Dillon Reservoir, this ride offers panoramic views of the Tenmile and the Gore ranges. It's also in a prime location for lunch breaks or immediately after work, though it gets busy on weekends.

"Oro Grande is one of the earliest trails to open in the county each season," town of Breckenridge Deputy Town Manager Scott Reid said. "It faces west and a little bit south, so it dries off quickly and has killer views of the lake and the Tenmile Range as well as down the Gore Range."

FAST FACTS

DISTANCE: 3.9 miles
TIME: 1 hour
ELEVATION: 9,263 to 9,556 feet, 293 vertical feet gained
SEASON: Mid-May to mid-October
EXTENSIONS: Summit County recpath, Tenderfoot Mountain and Dillon dump trails
ACCESS: Dirt road loop for biking,hiking, trail running, dogs on leash
PARKING: Tenderfoot Mountain Trailhead above the Dillon Water Treatment Plant on County Road 51.

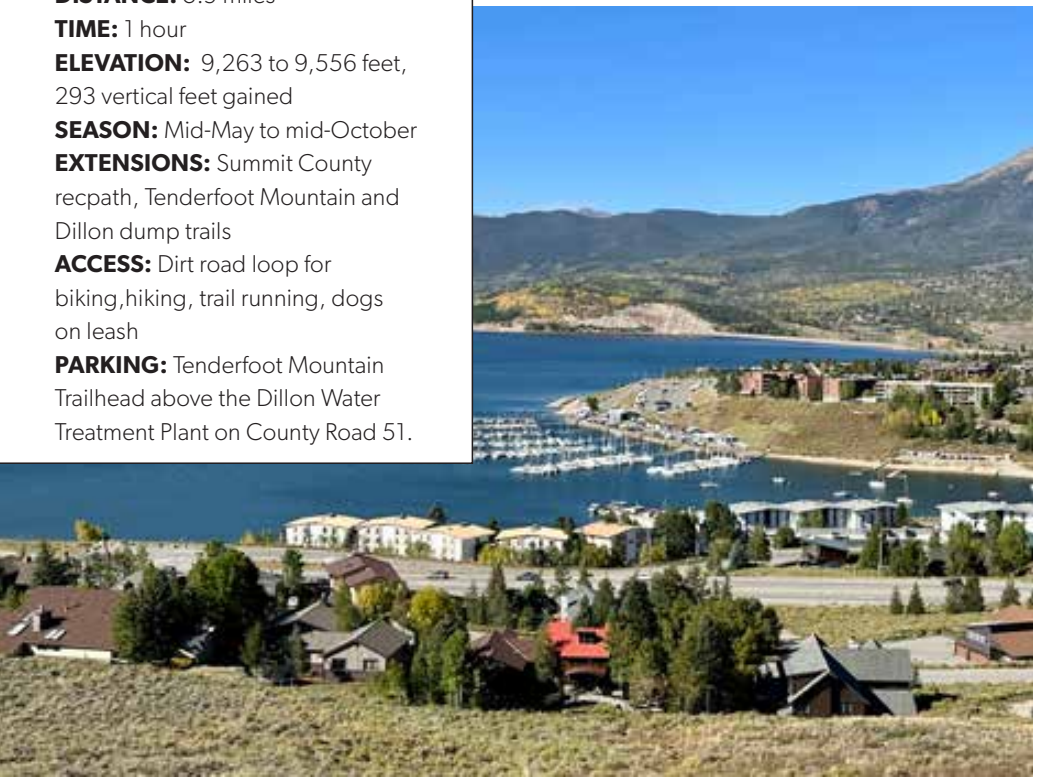

PHOTO: (TOP) ARTHUR SCOTT | (BOTTOM) JOHN MEYER

TENDERFOOT MOUNTAIN

EASY

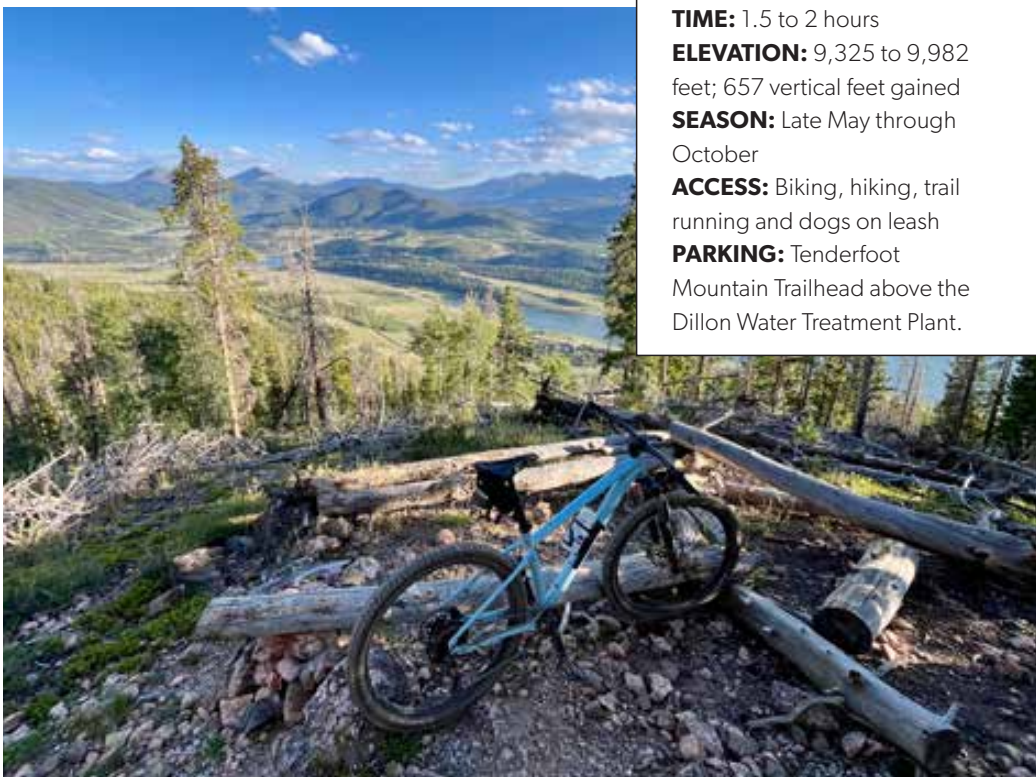

A parking lot can be found off of County Road 51 just above the Dillon Water Treatment Plant. It's here where you can access the northwest terminus of the Oro Grande Trail, a main vein near the base of Tenderfoot Mountain that is very popular among hikers, trail runners, mountain bikers and other kinds of recreators.

You'll move through the first 1,200 feet of distance on the wide trail before a canopy of trees gives way to a truly glorious view of Peak 1, the Dillon Reservoir and much of Summit County. It's here where you'll find a sign directing you up to the left.

Beware that you'll need plenty of SPF thanks to all of the open views.

FAST FACTS

DISTANCE: 3.2-mile loop
TIME: 1.5 to 2 hours
ELEVATION: 9,325 to 9,982 feet; 657 vertical feet gained
SEASON: Late May through October
ACCESS: Biking, hiking, trail running and dogs on leash
PARKING: Tenderfoot Mountain Trailhead above the Dillon Water Treatment Plant.

WEST RIDGE TRAIL

MODERATE/ADVANCED

Most people have a love-hate relationship with West Ridge Trail out of Keystone. It's one of those trails with a long, dirt-road uphill haul, tight switchbacks and a handful of technical rock sections. But it's all worth the grind when you connect with the Colorado Trail outside of The Outback at Keystone and enter one of the fastest, free-flowing descents in Summit: nearly 4 miles of pure downhill through wide-open meadows and forests littered with clear-cut pines.

The trail offers stunning views of the Tenmile Range to the west and brief glimpses of the Continental Divide to the east. The route is closed in May and early June for elk calving.

FAST FACTS

DISTANCE: 14 miles
TIME: 3 to 4 hours biking, 6 to 7 hours hiking
ELEVATION: 9,240 to 11,100 feet; 1,860 vertical feet gained
SEASON: Late June to early October
EXTENSIONS: Colorado Trail, Keystone Gulch Road
ACCESS: Singletrack biking, hiking, trail running and dogs on leash
PARKING: Off Soda Ridge Road turn left at the dirt parking lot on Keystone Gulch Road and park near the gate.

PHOTO: (TOP) DAVID WICKER | (BOTTOM) MELANIE YOHN

FRISCO & COPPER

SCAN FOR MAP

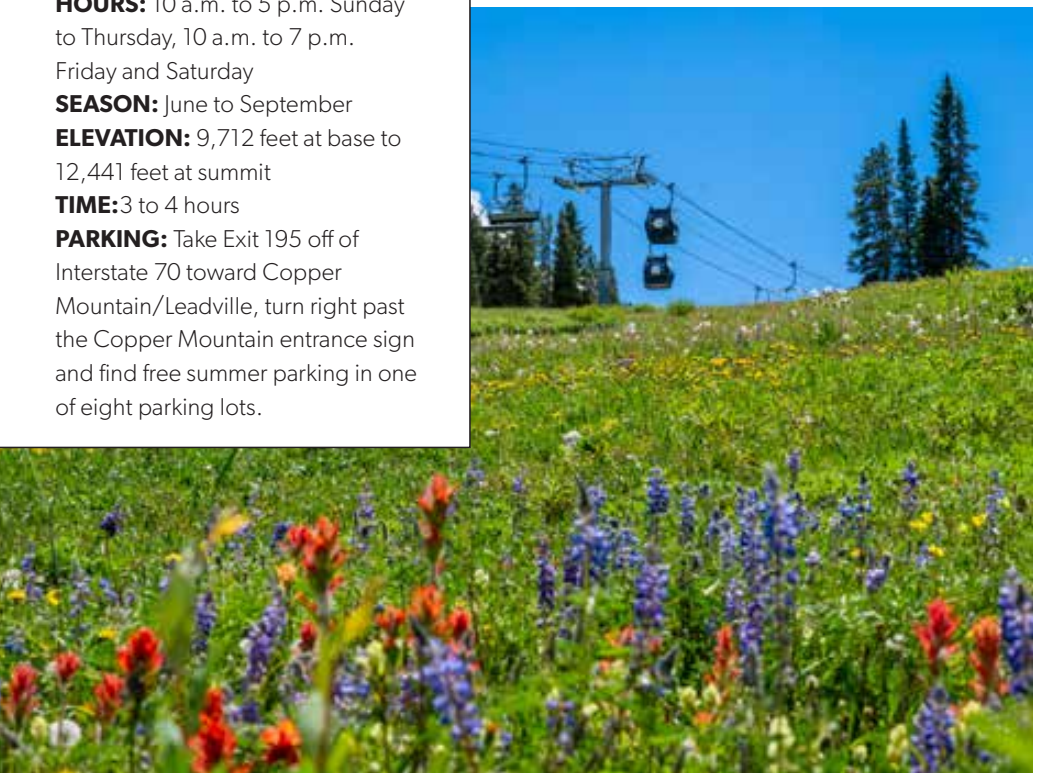

Copper Mountain Resort, Frisco Bike Park, the Tenmile Recpath — what more could you want? Family friendly trails such as Rainbow Lake offer the perfect day excursion, while those seeking a challenge can take on longer routes, including the iconic Vail Pass Recpath.

FAST FACTS

HOURS: 10 a.m. to 5 p.m. Sunday to Thursday, 10 a.m. to 7 p.m. Friday and Saturday
SEASON: June to September
ELEVATION: 9,712 feet at base to 12,441 feet at summit
TIME: 3 to 4 hours
PARKING: Take Exit 195 off of Interstate 70 toward Copper Mountain/Leadville, turn right past the Copper Mountain entrance sign and find free summer parking in one of eight parking lots.

COPPER MOUNTAIN

ALL LEVELS

Copper Mountain Resort offers more than 18 miles of downhill mountain biking trails with a variety of terrain options for riders of all abilities. Copper's mountain biking trails are lift-served via the American Eagle lift in Center Village. Trails can also be accessed free of charge by pedaling up the resort's service road, A-Road.

Since 2021, Copper has continued expanding its trail network. Last summer, the resort introduced two new trails: Black Mamba, an expert-level trail that added more than 1.3 miles of advanced terrain to Copper's network, and Jack Rabbit Jumps, an intermediate jump line designed for riders looking to build confidence and progress their jumping skills.

PHOTO: (TOP) GARY MEYERS | (BOTTOM) CURTIS DEVORE/COPPER MOUNTAIN RESORT

FRISCO PENINSULA

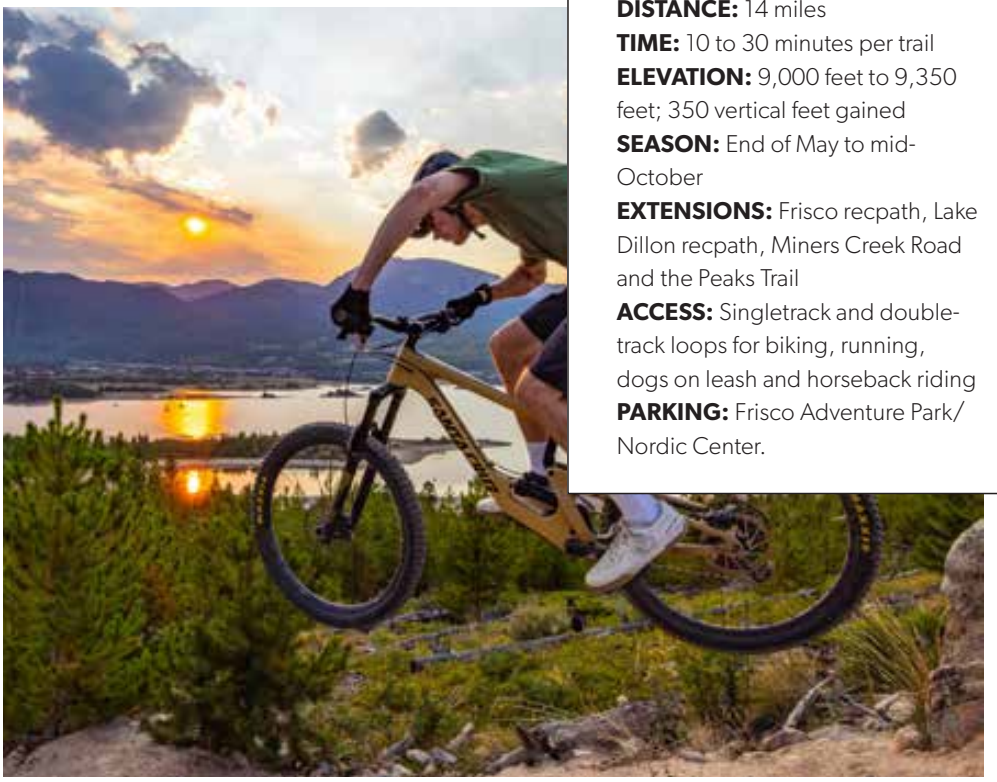

EASY/MODERATE

Frisco Nordic Center trails manager Pete Swenson says the best feature of the Frisco Peninsula's trail system is its family friendly nature. From expert-level flow trails with gap jumps to mellow rides with views of the lake and towering peaks surrounding Summit County, it's got something for all skill levels. A perfect place to progress as a biker, this trail system a locals favorite since you can find a hike or ride to suit any mood.

Swenson highlighted the Perimeter Trail, known for being one of the only mountain-bike trails in the county that borders a lake the entire way, following along the shoreline of the Dillon Reservoir.

FAST FACTS

DISTANCE: 14 miles
TIME: 10 to 30 minutes per trail
ELEVATION: 9,000 feet to 9,350 feet; 350 vertical feet gained
SEASON: End of May to mid-October
EXTENSIONS: Frisco recpath, Lake Dillon recpath, Miners Creek Road and the Peaks Trail
ACCESS: Singletrack and double-track loops for biking, running, dogs on leash and horseback riding
PARKING: Frisco Adventure Park/ Nordic Center.

FRISCO BIKE PARK

ALL LEVELS

There are dozens of features at the Frisco Bike Park for kids and adults. Looking for more traditional wooden and natural hits? It's got you covered. Yearning for gravity line drops on your new downhill bike? Ditto.

There are six different features for mountain bikers who are wanting to improve their park skills. The park features a pump track, skills course, practice drop zone for beginners, a slopestyle course, dirt jumps and a dual slalom course.

The pump track's continuous dirt loop of rollers and berms is an ideal place to learn handling skills while adjusting to riding above 9,000 feet.

FAST FACTS

HOURS: Dawn to dusk daily
SEASON: Late May to October
COST: Free
PARKING: Frisco Day Lodge and Nordic Center lots, 621 Recreation Way.

PHOTO: (TOP) CASEY DAY | (BOTTOM) TODD POWELL/TOWN OF FRISCO

GOLD HILL

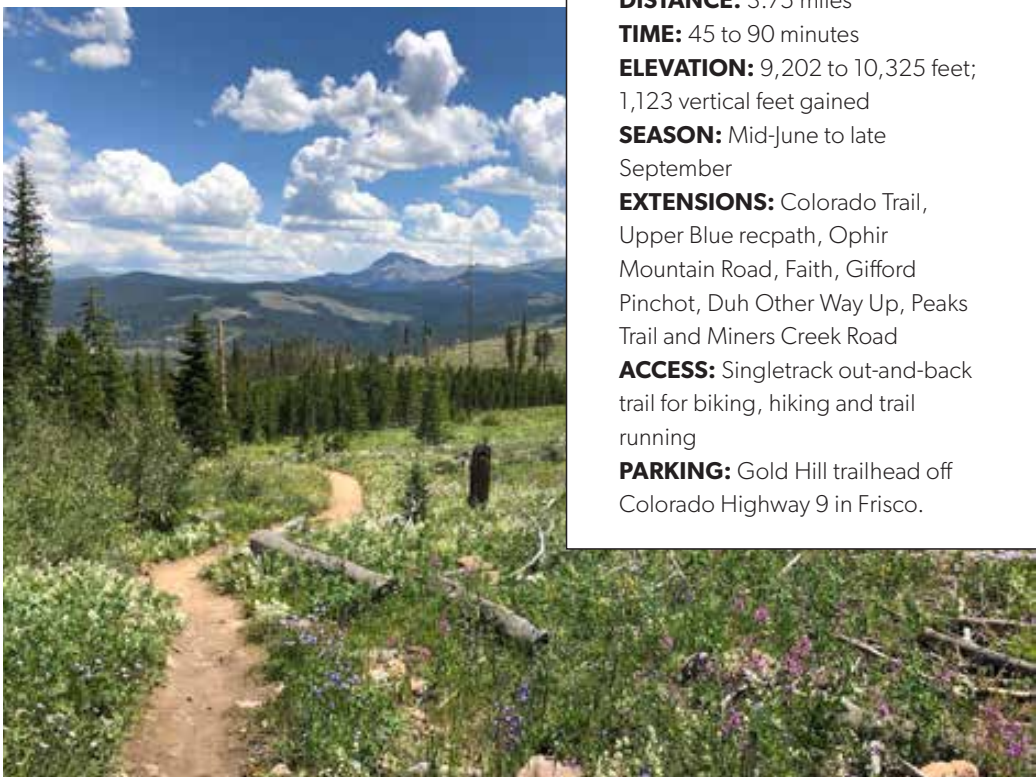

MODERATE/ADVANCED

Gold Hill is the start of Segment 7 of the classic Colorado Trail. The 3-mile uphill stretch is a moderately difficult climb most of the way, ascending 1,091 feet over the first 3 miles of the trail before transitioning to a more advanced black-diamond final portion of the out-and-back trail that descends just under 400 feet from the top of Gold Hill to a junction with the Peaks Trail.

"Gold Hill is super rocky up high, with a singletrack down lower that has a great parking area right off the highway and is easy to find," Summit County Mountain Bike Alliance board emeritus Ben Ferrante said. "It was recently clear-cut, so there are nice, big sightlines."

FAST FACTS

DISTANCE: 3.75 miles
TIME: 45 to 90 minutes
ELEVATION: 9,202 to 10,325 feet; 1,123 vertical feet gained
SEASON: Mid-June to late September
EXTENSIONS: Colorado Trail, Upper Blue recpath, Ophir Mountain Road, Faith, Gifford Pinchot, Duh Other Way Up, Peaks Trail and Miners Creek Road
ACCESS: Singletrack out-and-back trail for biking, hiking and trail running
PARKING: Gold Hill trailhead off Colorado Highway 9 in Frisco.

MAYFLOWER GULCH

EASY/MODERATE

Mayflower Gulch is a four-wheel drive road that's not that far off the beaten path. A relatively well-maintained dirt road accesses an impressive, high-Alpine mountain cirque dotted with the remains of several old mining cabins — the relics from the aging Boston Mine camp site.

When hit at the right time of year, wildflowers dot the meadow. It's not a classic fall ride with thick, yellowing aspens, but the namesake gulch is teeming with color.

"I am a flower fanatic, so I tend to go where the best flowers are," Karn Stiegelmeier said. "Mayflower is the best for flowers."

FAST FACTS

DISTANCE: 7 miles
TIME: 3 to 4 hours
ELEVATION: 10,978 to 12,055 feet; 1,077 vertical feet gained
SEASON: July to early October
ACCESS: Out-and-back dirt road for biking, hiking, trail running and dogs on leash
PARKING: Large parking area off of Highway 91, south of Copper Mountain toward Leadville.

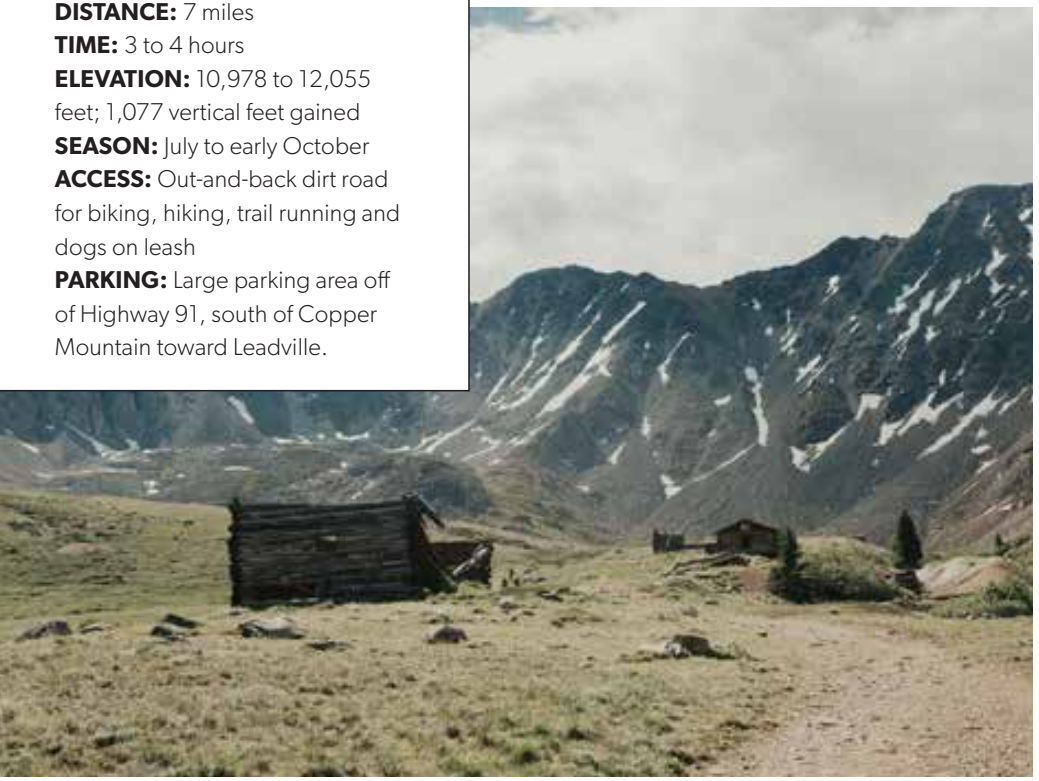

PHOTO: (TOP) TRAILFORKS | (BOTTOM) CHRISTINA SEIFERT PHOTOGRAPHY

MINERS CREEK ROAD

MODERATE/EXPERT

Providing quick access to a network of singletrack trails on the south edge of Frisco, Miners Creek Road winds past beaver ponds and a meandering creek as it climbs toward the Tenmile Range and, eventually, Wheeler Trail to Copper Mountain. The road is lined with a combination of aspens, pines and thick underbrush.

Users can access a slew of rocky, rooty, iconic trails, including portions of the Peaks Trail, South Rainbow Trail, Bill's Ranch Trail and Gold Hill Trail. Routes like Peaks and Gold Hill are long excursions, but thanks to Miners Creek Road, users can create a nearly bottomless series of loops that never leave the Frisco area.

FAST FACTS

DISTANCE: 6 miles
TIME: 1 to 2 hours
ELEVATION: 9,040 to 10,160 feet; 1,120 vertical feet gained
SEASON: June to late October
ACCESS: Dirt road for biking, hiking, running and dogs on leash

PHOTO: RYAN SPENCER

RAINBOW LAKE

FAST FACTS

DISTANCE: 1.6 miles
TIME: 30-40 minutes
ELEVATION: 9,114 feet to 9,264; 157 vertical feet gained
SEASON: Middle of May through October
ACCESS: Hiking, biking, trail running. Dogs allowed on leash
PARKING: At Zach's Stop off of 2nd Avenue in Frisco. If trailhead parking is full, visitors should park on avenues near Frisco Main Street.

EASY/MODERATE

The Rainbow Lake Trail in Frisco is one of the easiest, but most scenic, routes in the Frisco area.

Popular for activities like hiking, mountain biking, trail running and even cross-country skiing, the year-round trail offers beautiful views of a natural lake, Frisco and the surrounding mountain landscape.

In total, the trail gains approximately 157 feet over the 1.6-mile out-and-back trip. The Rainbow Lake hike also allows users to easily add on by exploring Miner's Creek Road or venturing over to the old Masontown ruins en route to the top of Mount Royal.

FRISCO & COPPER

TENMILE RECPATH

EASY/PAVED

The lower portion of the Tenmile recpath, is a favorite jaunt for runners, cyclists, hikers and longboarders. Unlike the steep upper sections of Vail pass, it follows a mild downhill grade the entire way from Copper Mountain to Frisco, ending on the west end of Main Street. From there, it connects with the remaining 50-plus miles of recpath.

It's a more-or-less straight shot along the I-70 corridor, hidden from the hustle and bustle by thick stands of lush aspen groves. It occasionally pops into sight, but most trail users are too distracted by 15-foot boulders and the craggy, nearly vertical face of the Tenmile Range to notice long-haul trucks zooming past.

FAST FACTS

DISTANCE: 7.2 miles
TIME: 30 minutes to 2 hours
ELEVATION: 9,075 to 9,700 feet; 625 vertical feet gained
SEASON: Late May or early June to October
ACCESS: Two-way paved recpath for biking, running, walking, roller blading and dogs on leash
PARKING: The Kayak overnight parking lot

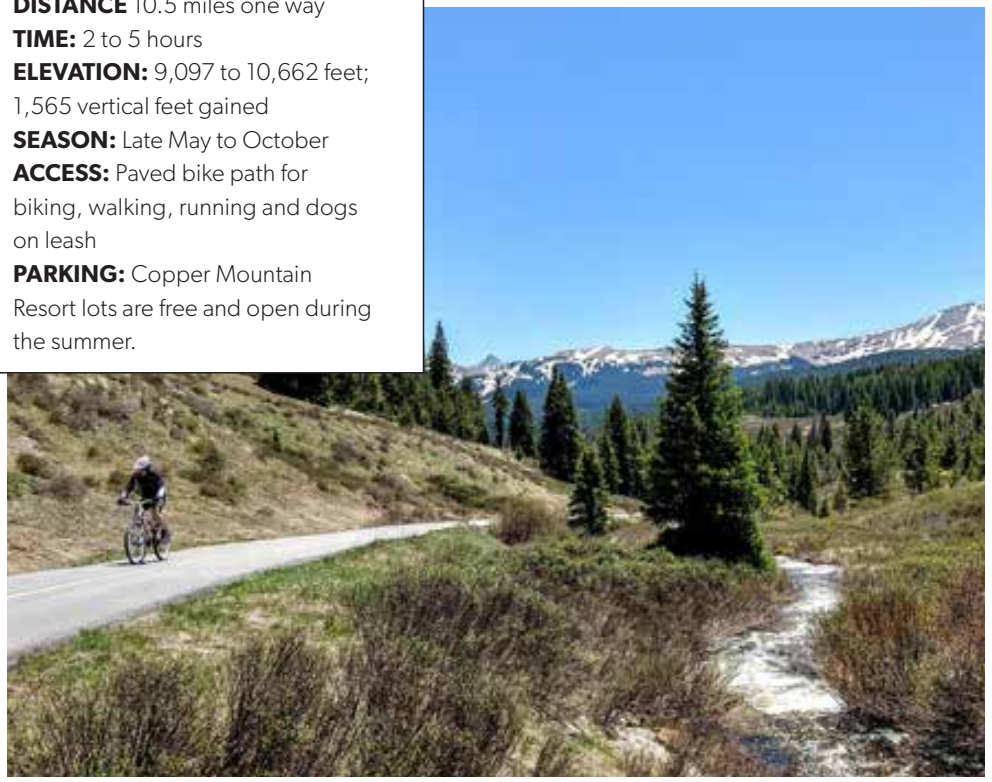

PHOTO: (TOP) ANDREW MACIEJEWSKI | (BOTTOM) ANDREW MAGUIRE

VAIL PASS RECPATH

FAST FACTS

DISTANCE 10.5 miles one way
TIME: 2 to 5 hours
ELEVATION: 9,097 to 10,662 feet; 1,565 vertical feet gained
SEASON: Late May to October
ACCESS: Paved bike path for biking, walking, running and dogs on leash
PARKING: Copper Mountain Resort lots are free and open during the summer.

MODERATE

Some area bike shops offer shuttles to the summit of Vail Pass for a strictly downhill ride. Those opting for a shorter trip can go from Frisco to Copper Mountain Resort.

"The holy grail of the High Country," local mountain biker Patrick Linfante said. "Once you feel comfortable doing some climbing, take your bike all the way to the top of Vail Pass. Vail Pass offers one of the only mountain passes around that allows you to summit the mountain completely on a bike path, away from any sort of vehicular traffic."

Make sure to check the weather before you begin as summer snow is possible.

SUMMIT COUNTY OPEN SPACE AND TRAILS

SILVERTHORNE

SCAN FOR MAP

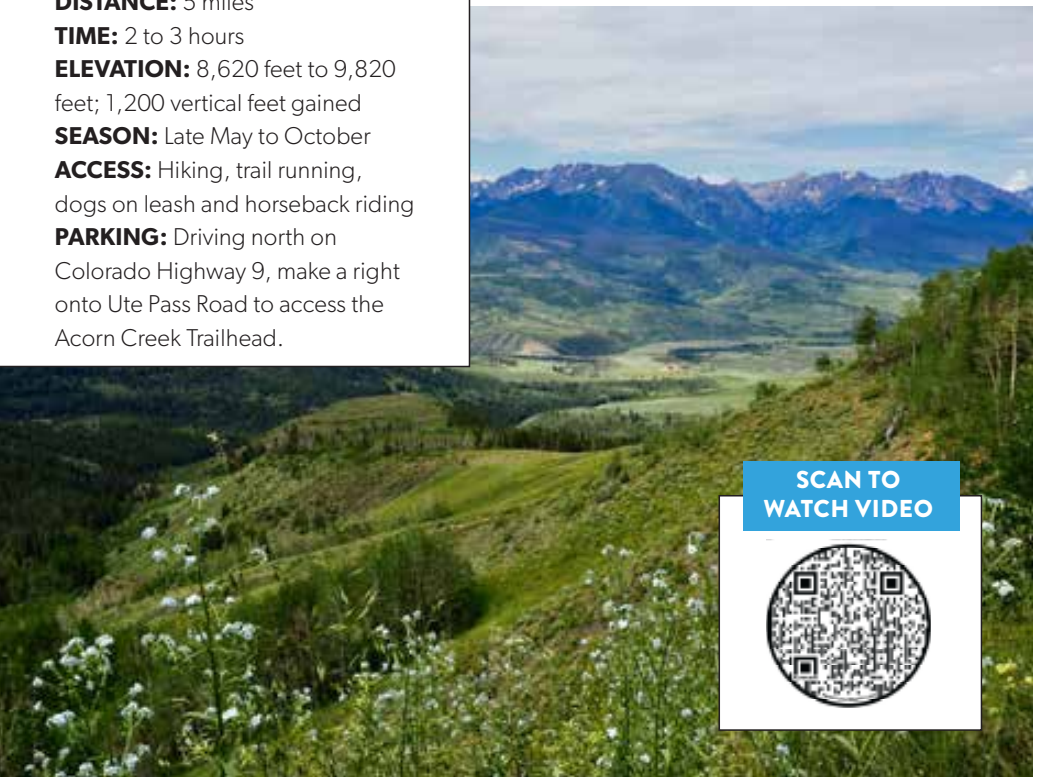

Silverthorne boasts some of Summit County's most challenging high-elevation trails, but it still has plenty of laid-back adventures. This year, we've added Trent Park's bike pump tracks to the guide, one of the town's most popular recreational features.

FAST FACTS

DISTANCE: 5 miles
TIME: 2 to 3 hours
ELEVATION: 8,620 feet to 9,820 feet; 1,200 vertical feet gained
SEASON: Late May to October
ACCESS: Hiking, trail running, dogs on leash and horseback riding
PARKING: Driving north on Colorado Highway 9, make a right onto Ute Pass Road to access the Acorn Creek Trailhead.

ACORN CREEK TRAIL

EASY/MODERATE

The Acorn Creek Trail near Silverthorne is a sight to behold during the wildflower season from late May to August.

Featuring brightly-colored flowers and Aspen trees full of glistening leaves, the trail has no shortage of natural beauty. Even outside of the wildflower season, the trail offers views of Gore Range to the west and the several historic homesteads down below.

The trail is also popular to hike, horseback ride or trail run in the fall when many of the area's deciduous trees transform from a light green to shades of yellow. Hikers will encounter tiny streams, rocky sections and secluded wooded areas.

PHOTO: (TOP) STEVE LAUDER/TOWN OF SILVERTHORNE | (BOTTOM) ELAINE COLLINS

ANGLER MOUNTAIN TRAIL

MODERATE

The Angler Mountain Trail is an ideal hike for many recreationists. For a local looking for a solid one- to two-hour workout, someone who's getting back into shape, or a visitor who's less adjusted to Rocky Mountain hiking, this trail offers solid elevation gain if you want to keep going.

The first half of the hike is ideal for dogs considering the canopied shade. On hot days, you should be sure to hydrate when you come through an overarching cluster of aspens that gives way to an open meadow. For the next 10 minutes, as you climb in a rolling fashion to 9,400 feet, the sun will beat down on you. The moderate grade continues up from here, which is great for trail running.

FAST FACTS

DISTANCE: 5 miles
TIME: 2 to 3 hours
ELEVATION: 8,620 feet to 9,820 feet; 1,200 feet vertical gained
SEASON: Late May to October
ACCESS: Hiking, trail running and dogs on leash. Not open to bikes
PARKING: Driving north on Colorado Highway 9 in Silverthorne, make a right onto Bald Eagle Drive. Parking lot/trailhead is half-mile up on the right.

Don't let aches, pains, or an injury keep you off the trails.

At CommonSpirit Summit Orthopedics, our board-certified and fellowship-trained physicians live, work, and play right here in Summit County.

We're here to help you make the most of your summer with expert orthopedic care from a team who loves hiking, biking, and trail running just as much as you do.

Our providers specialize in:

- Foot and ankle
- Hand and wrist
- Knee and hip
- Orthopedic trauma care
- Shoulder and elbow
- Spine
- Sports medicine

PHOTO: (TOP) VICTORIA MCCULLOUGH

BLUE RIVER TRAIL

FAST FACTS

DISTANCE: 3.5 miles
TIME: 30 to 45 minutes
ELEVATION: 8,500 to 8,730 feet
SEASON: Early May to November
ACCESS: Out-and-back paved recpath for biking, walking, running and dogs on leash
PARKING: Blue River Fields dirt lot, Silverthorne Recreation Center or by following Colorado Highway 9 north through the town of Silverthorne to North Pond Park.

EASY/PAVED

This trail is lined with lush, thick pines and oaks from start to finish, and it is mercifully shady on hot days. It also passes by several picnic tables and secluded benches perfect for a family lunch outing.

The Blue River Trail is maintained by the town of Silverthorne and is open year-round. It's widely popular with runners, cyclists, anglers and day-trippers visiting the Summit County area.

Watch out for dogs, and be wary of several blind corners in the town core. If parking in town, be mindful of posted signage and obey any lot restrictions near businesses.

BUFFALO MOUNTAIN

ADVANCED

The standard hiking route up Buffalo Mountain starts from the Buffalo Cabin trailhead at the top of the Wildernest neighborhood. The limited parking spots across the road from the trailhead can fill up early, especially on weekends, so plan the start of your hike accordingly. From the trailhead, the route climbs moderately and will get your blood pumping right away.

The trail will soon lead you directly through the burn zone from the 2018 Buffalo Mountain Fire. The wildflowers blooming amid the scorched trees are a reminder of how Mother Nature can recover with beauty in the face of destruction.

FAST FACTS

DISTANCE: 6.2 miles
TIME: 3.5 to 5 hours
ELEVATION: 9,769 feet to 12,777 feet; 3,008 vertical feet gained
SEASON: Mid-July to September
ACCESS: Hikers and dogs on leash
PARKING: Buffalo Cabin and Lily Pad Lake trailhead.

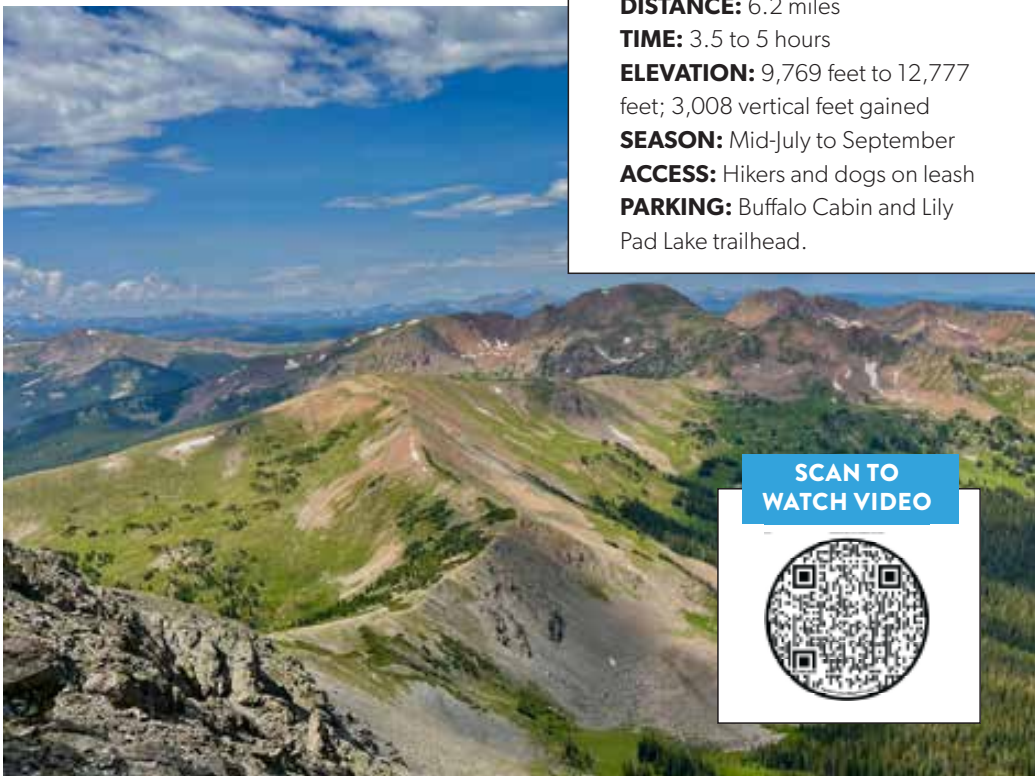

PHOTO: (TOP) VICTORIA MCCULLOUGH | (BOTTOM) LUMENATI PRODUCTIONS

ECCLES PASS LOOP

FAST FACTS

DISTANCE: 12.3 miles
TIME: 6 to 8 hours
ELEVATION: 9,778 to 11,917 feet; 2,139 vertical feet gained
SEASON: July to September
ACCESS: Hiking, trail running and dogs on leash
PARKING: North Tenmile, Buffalo Cabin or Willowbrook trailheads.

ADVANCED

Hike along multiple peaks in this trek over Eccles and Red Buffalo passes. Get started at the Buffalo Cabin trailhead early and hike into the Eagles Nest Wilderness Area on the South Willow Creek Trail to the Gore Range Trail. About 2.5 miles into the hike, stop to enjoy the beauty of the valley of Buffalo and Red peaks.

Hiking through here is a pleasant surprise, with the beautiful South Willow Falls still trickling near the end of a dry summer and the colorful vegetation hugging the cascading South WIllow Creek along the way. You'll have to be careful when hiking over ebbs and flows in the creek, though downed logs help to bridge the trail.

GORE RANGE LOOP

ADVANCED

This loop brings recreationists to three lakes off of the Gore Range Trail: Eaglesmere, Tipperary and Surprise.

The trail starts by opening up to a vista overlooking Dora Mountain and Lower Cataract Lake below. The singletrack trail has views of wildflowers before you enter the forest and hear the roar of a mighty waterfall.

Follow the Eaglesmere Trail for 3.2 miles where you will reach the junction with the Gore Range Trail. Hang a right here, heading west on the Gore Range Trail to reach Eaglesmere Lake. You'll soon reach a few crossings of Cataract Creek, so you don't lose the trail.

FAST FACTS

DISTANCE: 12 miles
TIME: 5 to 7 hours
ELEVATION: 8,730 to 8,712 feet; 2,702 vertical feet gained
SEASON: Late June to October
ACCESS: Hiking, backpacking and dogs on leash
PARKING: Eaglesmere trailhead off Cataract Creek Road in Heeney.

PHOTO: (TOP) TOWN OF SILVERTHORNE | (BOTTOM) ANTONIO OLIVERO

PTARMIGAN PEAK LOOP & SALT LICK

ADVANCED

On the northeast side of Colorado Highway 9, the Ptarmigan Loop trail is a grueling climb with rewarding views.

Any activity on the Ptarmigan Peak Loop requires top-notch fitness. Beware that downed trees on Ptarmigan may drape over trails and make activities difficult, especially biking.

"The start of the Ptarmigan Loop is absolutely brutal, could be a hike-a-bike for most," Eric Cutler said. "But after that there is some nice rolly singletrack that will take you up and down until you get to a bench 2 miles up with a beautiful view."

FAST FACTS

DISTANCE: 4 miles (Ptarmigan Loop), 12 miles (Ptarmagin Peak)
TIME: 1 to 2 hours (Ptarmigan Loop), 4 to 6 hours (Ptarmigan Peak)
ELEVATION: 9,081 to 12,498 feet
SEASON: Late June to October
ACCESS: Multiuse, singletrack for biking (outside of wilderness area), hiking, trail running and dogs on leash
PARKING: Off Ptarmigan Road on the right, ride your bike up a very steep portion of the road from there for about one-quarter mile to the start of the Ptarmigan Loop. For the Salt Lick System, park at the Salt Lick trailhead in Wildernest.

TRENT PARK

FAST FACTS

HOURS: Dawn to Dusk
SEASON: Year-round as conditions allow (town doesn't shovel)
ACCESS: bikes, skateboards, scooters and inline skates. No e-bikes or other motorized vehicles, including one-wheels and remote-control cars.

Silverthorne's new Trent Park pump tracks are one of the town's most popular recreational features. The two asphalt bike pump tracks include a beginner and an advanced track. The asphalt flow doesn't require pedaling, as riders use the bike to propel themselves down the waves to gain momentum. These pump tracks are the first of their kind in Summit County and make Silverthorne home to one of the only ADA-accessible pump tracks in the nation.

The Trent Park pump tracks are open year-round in Silverthorne, and while the town doesn't shovel the asphalt tracks, Silverthorne's sunny days keep them going for a good portion of the year. From expert bikers looking for a fun way to ride and groove, to little ones learning how to use a strider bike, to skateboarders and scooter riders, the Trent Park pump tracks have been a community hit. No e-bikes or other motorized vehicles allowed at the pump tracks.

PHOTO:(TOP) MATT HUTCHESON | (BOTTOM) CURTIS DEVORE/TOWN OF SILVERTHORNE

UTE PASS ROAD

MODERATE/PAVED

There is only one way to describe Ute Peak, which resides in the Williams Fork Mountains north of Silverthorne: an underappreciated Summit County gem.

Each summer, the Colorado High Country conversation and hiking appetites quickly turn to 14ers. The state's 14,000-foot mountains are great and should be appreciated, but for locals it's smaller mountains with equally-demanding hikes — like the one up the 12,303-foot Ute Peak — that shouldn't go forgotten.

From the trailhead, the views of the monstrous, jagged Gore Range to the west are stunning and will be etched into your memory for quite a while.

FAST FACTS

DISTANCE: 5.9-mile one-way from top of Ute Pass Road, 15.6 miles from Columbine Landing Recreation Site
TIME: 3 to 5 hours
ELEVATION 9,570 feet to 12,288 feet; 3,115 vertical feet gained
SEASON: Mid-July to September
ACCESS: Biking, hiking, backpacking, trail running and dogs on leash
PARKING: Ute Pass pull-offs at top of Ute Pass Road off Colorado Highway 9 north of Silverthorne, for biking Columbine Landing Recreation Site.

PHOTO: ANTONIO OLIVERO
